BNY Mellon Investment Servicing (US) Inc.

For more information, contact UBS Asset Management at 888-793 8637. Mutual funds are sold by prospectus, which includes more complete information on risks, charges, expenses and other matters of interest. Investors should read the prospectus carefully before investing. An investment in the Fund is only one component of a balanced investment plan.

You could lose money by investing in a money market fund. Although a money market fund seeks to preserve the value of your investment at \$1.00 per share, a fund cannot guarantee it will do so. An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. A money market fund's sponsor has no legal obligation to provide financial support to a money market fund, and you should not expect that the fund's sponsor will provide financial support to a money market fund at any time.

Instrument allocation^{5,9}

Performance data quoted represent past performance, and the Fund's yield will fluctuate. Past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted.

- The master fund has adopted a policy to invest 99.5% or more of its total assets in cash, government securities, and/or repurchase agreements that are collateralized fully (i.e. collateralized by cash and/or government securities) in order to qualify as a "government money market fund" under federal regulations. In addition, in order to be a "Treasury" fund, under normal circumstances, the master fund seeks to achieve its objective by investing at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in securities issued by the US Treasury and in related repurchase agreements. Under normal circumstances the master fund expects to invest substantially all of its assets in securities issued by the US Treasury and in related repurchase agreements.
- The Fund may invest a significant percentage of its assets in repurchase agreements. Repurchase agreements involve transactions in which the Fund purchases securities issued by the US Treasury and simultaneously commits to resell them to the same counterparty at a future time and at a price reflecting a market rate of interest. While income earned by the Fund's direct investments in securities issued by the US Treasury may qualify for favorable state and local income taxation, income related to repurchase agreements may not be so advantaged. Investing in repurchase agreements may permit the Fund to quickly take advantage of increases in short-term rates.
- The Fund is rated Aaa-mf by Moody's, which reflects the high credit quality of the Fund's investments and the diversification of the portfolio, as well as the Fund manager's disciplined investment strategy, well-established team approach and its strong risk management capabilities. Further information regarding Moody's rating methodology may be found on its website at www.moody's.com. The fund is rated AAAMmf by Fitch Ratings, which reflects Fitch's view of (1) the fund's overall credit quality and diversification; (2) low exposure to interest rate and spread risk; (3) holdings consistent with shareholder profiles and concentrations; and (4) maturity profiles consistent with rating criteria. Further information regarding Fitch's rating methodology may be found on its website at www.fitchratings.com.
- The fund and UBS Asset Management (Americas) Inc. ("UBS AM") have entered into a written fee waiver agreement pursuant to which UBS AM is contractually obligated to waive its management fees so that the total ordinary operating expenses of the fund through August 31, 2021, do not exceed 0.14%. The fee waiver agreement may be terminated by the fund's board at any time and also will terminate automatically upon the expiration or termination of the fund's contract with UBS AM. Absent this waiver, the yields would have been lower.
- Data is for related master portfolio.
- Unsubsidized yield refers to the yield before waivers/reimbursements.
- The MFR First Tier Treasury and Repo Institutional Average is a subset of the Money Fund Report's (MFR) all-taxable universe consisting of funds managed to a "first tier" standard and which are offered primarily to institutions. The Money Fund Report AveragesTM are published by iMoneyNet, Inc., and reflects yields net of fees and expenses. Used with permission.
- Source: Bloomberg; used with permission. A T-bill is a short-term discounted, government debt instrument of one year or less, issued in \$10,000 denominations that pays its face value at maturity.
- The master fund is actively managed and its composition will differ over time. Portfolio composition may exceed 100% due to rounding.

Current and future portfolio holdings are subject to risk.

Not FDIC insured. May lose value. No bank guarantee.
