Experienced management team

A team of money market specialists under the direction of Robert Sabatino is responsible for the day-to-day investment management. UBS Asset Management's experienced and knowledgeable portfolio managers select and evaluate investments to develop a diversified portfolio that seeks to achieve the Fund's objective.

Investment approach

While seeking to maximize current income, our investment management team emphasizes credit quality, liquidity and appropriate diversification. The Fund is a "feeder fund" that invests in securities through an underlying "master fund." The master fund invests in a diversified portfolio of high-quality, short-term, US dollar-denominated money market instruments. Our credit and portfolio management teams continually monitor individual issuers in an attempt to assure maintenance of credit quality.
