

UBS RMA Government Money Market Fund

Semiannual Report | October 31, 2018

UBS RMA Government Money Market Fund

December 19, 2018

Dear Shareholder,

We present you with the semiannual report for UBS RMA Government Money Market Fund for the six months ended October 31, 2018 (the “reporting period”).

Performance

The US Federal Reserve Board (the “Fed”) raised the federal funds rate twice during the six months ended October 31, 2018 and ended the reporting period in a range between 2.00% and 2.25%. The federal funds rate or the “fed funds rate,” is the rate US banks charge one another for funds they borrow on an overnight basis. (For more details on the Fed’s actions, see below.) The yields on a wide range of short-term investments moved higher over the period.

The seven-day current yield for the Fund as of October 31, 2018 was 1.71%, versus 1.24% on April 30, 2018. (For more information on the Fund’s performance, refer to “Yields and characteristics at a glance” on page 4.)

An interview with Portfolio Manager Robert Sabatino

Q. How would you describe the economic environment during the reporting period?

A. The lengthy US economic expansion continued during the reporting period. Looking back, the US Commerce Department reported that gross domestic product (“GDP”) grew at a 2.2% seasonally adjusted annualized rate during the first quarter of 2018. Second quarter 2018 GDP grew at a 4.2% rate. This represented the strongest pace since the third quarter of 2014. The initial estimate for third quarter 2018 GDP growth was 3.5%.

Q. How did the Fed react to the economic environment?

A. As expected, the US Federal Reserve Board (the “Fed”) continued to normalize monetary policy during the reporting period. Starting in October 2017, the Fed began reducing its sizable balance sheet. In addition, the Fed raised rates in June and September 2018. The September move pushed the federal funds rate to a range between 2.00% and 2.25%. After the close of the reporting period, the Fed made one additional 0.25% rate hike on December 19, 2018, while continuing to pare its balance sheet.

Q. How did you position the Fund over the reporting period?

A. The Fund is a “feeder fund,” investing all of its assets in a “master fund,” namely Government Master Fund. We tactically adjusted Government Master Fund’s weighted average maturity (WAM)—which is the weighted average maturity of the securities in its portfolio—throughout the reporting period. The Fund’s WAM was 24 days when the reporting period began. At period end on October 31, 2018, it was 28 days.

Q. What level of portfolio diversification did you maintain during the reporting period?

A. At the issuer level, we continued to invest in US government securities, investing in numerous smaller positions with the goal of reducing risk and keeping the Fund highly liquid.

Q. What types of securities did the Government Master Fund emphasize?

A. At the security level, we increased the Master Fund’s exposure to direct US government and agency obligations and slightly increased its allocation to repurchase agreements backed by government securities. (Repurchase agreements are transactions in which the seller of a security agrees to buy it back at a predetermined time and price or upon demand.)

UBS RMA Government Money Market Fund

Investment goal:

Maximum current income consistent with liquidity and the preservation of capital.

Commencement:

June 24, 2016

Dividend payments:

Monthly

UBS RMA Government Money Market Fund

Q. What factors do you believe will affect the Fund over the coming months?

A. In our view, the US economy has the momentum to continue expanding heading into 2019. While inflation may edge higher, we expect it to be generally well behaved. Against this backdrop, we believe the Fed will take a measured approach in terms of raising interest rates and reducing its balance sheet. We anticipate continuing to manage the Fund focusing on risk and liquidity.

We thank you for your continued support and welcome any comments or questions you may have. For additional information on the UBS family of funds,* please contact your financial advisor, or visit us at www.ubs.com/am-us.

Sincerely,

Igor Lasun

This letter is intended to assist shareholders in understanding how the Funds performed during the six-month period ended October 31, 2018. The views and opinions in the letter were current as of December 19, 2018. They are not guarantees of future performance or investment results and should not be taken as investment advice. Investment decisions reflect a variety of factors, and we reserve the right to change our views about individual securities, sectors and markets at any time. As a result, the views expressed should not be relied upon as a forecast of the Fund's future investment intent. We encourage you to consult your financial advisor regarding your personal investment program.

* Mutual funds are sold by prospectus only. You should read it carefully and consider a fund's investment objectives, risks, charges, expenses and other important information contained in the prospectus before investing. Prospectuses for most of our funds can be obtained from your financial advisor, by calling UBS Funds at 800-647 1568, or by visiting our Website at www.ubs.com/am-us.

UBS RMA Government Money Market Fund

Understanding your Fund's expenses¹ (unaudited)

As a shareholder of the Fund, you incur ongoing costs, including management fees, service fees (non-12-b-1 fees) and other Fund expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Since the Fund is a "feeder fund" that invests in a corresponding "master fund," the expense information below reflects the combined effect of the two levels of expenses and not just those imposed directly at the feeder fund level.

The examples below are based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, May 1, 2018 to October 31, 2018.

Actual expenses

The first line in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over a period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses paid during period" to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate your actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs. Therefore, the second line in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds, if those other funds impose transactional costs—for example, exchange fees. In addition, if those transactional costs were included, your costs for those other funds would have been higher.

The examples do not reflect Resource Management Account® (RMA®) Program, Business Services Account BSA® Program or similar program fees as these are external to the Fund and relate to those programs.

	Beginning account value May 1, 2018	Ending account value ² October 31, 2018	Expenses paid during period ³ 05/01/18 to 10/31/18	Expense ratio during the period
Actual	\$1,000.00	\$1,007.40	\$2.48	0.49%
Hypothetical (5% annual return before expenses)	1,000.00	1,022.74	2.50	0.49

¹ The expenses for the Fund reflect the expenses of the corresponding master fund in which it invests in addition to its own direct expenses.

² "Actual—Ending account value" may or may not be reflective of a shareholder's actual investment experience during periods of very low interest rates. While the Fund declares dividends daily and pays them monthly, the amounts are rounded to the nearest \$0.01 on a daily basis with respect to each investor's account. As a result, investors whose Fund account balances earn daily dividends that total less than one half a cent on any given day will not accrue any dividends on that day.

³ Expenses are equal to the Fund's annualized net expense ratio, multiplied by the average account value over the period, multiplied by 184 divided by 365 (to reflect the one-half year period).

UBS RMA Government Money Market Fund

Notes to financial statements (unaudited)

Organization and significant accounting policies

UBS RMA Government Money Market Fund (“RMA Government Fund” or the “Fund”) is registered with the US Securities and Exchange Commission (“SEC”) under the Investment Company Act of 1940, as amended (“1940 Act”), as a diversified series of UBS Series Funds (the “Trust”) (formerly UBS Money Series), an open-end management investment company organized as a Delaware statutory trust on April 29, 1998. The Trust is a series mutual fund with twenty-one series. The financial statements for the other series of the Trust are not included herein.

RMA Government Fund is a “feeder fund” that invests substantially all of its assets in a “master fund”—Government Master Fund (the “Master Fund”, a diversified series of Master Trust, an open-end investment company registered with the SEC under the 1940 Act). The feeder fund and its respective Master Fund have the same investment objectives. RMA Government Fund commenced operations on June 24, 2016.

UBS Asset Management (Americas) Inc. (“UBS AM”) is the investment advisor and administrator for the Master Fund and the administrator for the Fund. UBS Asset Management (US) Inc. (“UBS AM—US”) serves as principal underwriter for the Fund. UBS AM and UBS AM—US are indirect wholly owned subsidiaries of UBS Group AG. UBS Group AG is an internationally diversified organization with headquarters in Zurich, Switzerland. UBS Group AG operates in many areas of the financial services industry.

The performance of the Fund is directly affected by the performance of the Master Fund. The value of such investment reflects the Fund’s proportionate interest in the net assets of the Master Fund (34.60% at October 31, 2018).

All of the net investment income and realized and unrealized gains and losses from investment activities of the Master Fund are allocated pro rata, based on respective ownership interests, among the Fund and other investors in the Master Fund (e.g., other feeder funds) at the time of such determination. The financial statements of the Master Fund, including the Portfolio of investments, are included elsewhere in this report and should be read in connection with the Fund’s financial statements. The Trust accounts separately for the assets, liabilities and operations of each series. Expenses directly attributable to each series are charged to that series’ operations; expenses which are applicable to all series are allocated among them on a pro rata basis.

In the normal course of business, the Fund may enter into contracts that contain a variety of representations that provide indemnification for certain liabilities. The Fund’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had any prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

The Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) is the exclusive reference of authoritative US generally accepted accounting principles (“US GAAP”) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the SEC under authority of federal laws are also sources of authoritative US GAAP for SEC registrants. The Fund’s financial statements are prepared in accordance with US GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

The following is a summary of significant accounting policies:

Valuation of investments—The Fund records its investment in the Master Fund at fair value. Securities held by the Master Fund are valued as indicated in the Master Fund’s Notes to financial statements, which are included elsewhere in this report.

Constant net asset value per share—RMA Government Fund attempts to maintain a stable net asset value of \$1.00 per share. There is no assurance, however, that the Fund will be able to maintain a stable net asset value of \$1.00 per share. The Fund and the Master Fund have adopted certain investment, portfolio valuation and dividend/distribution policies in an attempt to enable the Fund to do so. RMA Government Fund and the Master Fund have

UBS RMA Government Money Market Fund

Notes to financial statements (unaudited)

each adopted a policy to operate as a “government money market fund”. Under Rule 2a-7, a “government money market fund” invests 99.5% or more of its total assets in cash, government securities, and/or repurchase agreements that are collateralized fully (*i.e.*, collateralized by cash and/or government securities) (either directly or through a related master portfolio). As a “government money market fund”, RMA Government Fund is permitted to seek to maintain a stable price per share.

Liquidity fee and/or redemption gates—By operating as a “government money market fund”, RMA Government Fund is exempt from requirements that permit the imposition of a liquidity fee and/or temporary redemption gates. While the Fund’s Board of Trustees (the “Board”) may elect to subject RMA Government Fund to liquidity fee and gate requirements in the future, the Board has not elected to do so at this time.

Dividends and distributions—Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions is determined in accordance with federal income tax regulations, which may differ from US GAAP. These “book/tax” differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification.

Concentration of risk—The ability of the issuers of the debt securities held by the Master Fund to meet their obligations may be affected by economic and political developments particular to a specific industry, country, state or region.

Administrator

UBS AM serves as administrator to the Fund pursuant to an Administration Agreement approved by the Trust’s board. In accordance with the Administration Agreement, the Fund pays UBS AM an administration fee, which is accrued daily and paid monthly, at the below annual rate, as a percentage of the Fund’s average daily net assets:

Fund	Administration fee
RMA Government Fund	0.10%

At October 31, 2018, the Fund owed UBS AM for administrative services as follows:

Fund	Amount owed to UBS AM
RMA Government Fund	\$839,904

UBS AM may voluntarily undertake to waive fees and/or reimburse expenses in the event that Fund yields drop below a certain level. This undertaking is voluntary and not contractual and may be terminated at any time. At October 31, 2018, and for the period ended October 31, 2018, UBS AM did not owe and/or waive fees/reimburse expenses under this undertaking.

Shareholder services plan

UBS AM—US is the principal underwriter and distributor of the Fund’s shares. Under the shareholder services plan, UBS AM—US is entitled to a monthly shareholder servicing fee, payable by the Fund, at the below annual rate, as a percentage of the Fund’s average daily net assets:

Fund	Shareholder servicing fee
RMA Government Fund	0.25%

At October 31, 2018, the Fund owed UBS AM—US for shareholder servicing fees as follows:

Fund	Amount owed to UBS AM—US
RMA Government Fund	\$2,099,766

UBS RMA Government Money Market Fund

Notes to financial statements (unaudited)

UBS AM—US may voluntarily undertake to waive fees and/or reimburse expenses in the event that Fund yields drop below a certain level. This undertaking is voluntary and not contractual and may be terminated at any time. At October 31, 2018, and for the period ended October 31, 2018, UBS AM—US did not owe and/or waive fees/reimburse expenses under this undertaking.

Transfer agency and related services fees

UBS Financial Services Inc. provides certain services pursuant to a delegation of authority from BNY Mellon Investment Servicing (US) Inc. (“BNY Mellon”), the Fund’s transfer agent, and was compensated for these services by BNY Mellon, not the Fund. For the six months ended October 31, 2018, UBS Financial Services Inc. received from BNY Mellon, not the Fund, total delegated services fees as follows:

RMA Government Fund \$460,426

Shares of beneficial interest

There is an unlimited amount of \$0.001 par value shares of beneficial interest authorized. Transactions in shares of beneficial interest, at \$1.00 per share, were as follows:

	For the six months ended October 31, 2018	For the year ended April 30, 2018
Shares sold	29,044,736,133	58,479,716,844
Shares repurchased	(29,967,916,414)	(60,971,727,684)
Dividends reinvested	35,278,340	37,624,723
Net decrease in shares outstanding	(887,901,941)	(2,454,386,117)

Federal tax status

The Fund intends to distribute substantially all of its income and to comply with the other requirements of the Internal Revenue Code applicable to regulated investment companies. Accordingly, no provision for federal income taxes is required. In addition, by distributing during each calendar year substantially all of its net investment income, net realized capital gains and certain other amounts, if any, the Fund intends not to be subject to a federal excise tax.

The tax character of distributions paid to shareholders by the Fund during the fiscal year ended April 30, 2018 was ordinary income in the amount of \$44,026,306.

The components of accumulated earnings (deficit) on a tax basis for the current fiscal year will be determined after the Fund’s fiscal year ending April 30, 2019.

ASC 740-10 “Income Taxes—Overall” sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken. The Fund has conducted an analysis and concluded as of October 31, 2018, that there are no significant uncertain tax positions taken or expected to be taken that would require recognition in the financial statements. The Fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of operations. During the six months ended October 31, 2018, the Fund did not incur any interest or penalties.

Each of the tax years since the Fund’s inception in June 2016, remains subject to examination by the Internal Revenue Service and state taxing authorities.

UBS RMA Government Money Market Fund

General information (unaudited)

Monthly and quarterly portfolio holdings disclosure

The Fund and Master Fund will file their complete schedules of portfolio holdings with the US Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. The Fund's and Master Fund's Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Fund's and Master Fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC 0330. Additionally, you may obtain copies of Forms N-Q from the Fund and Master Fund upon request by calling 1-800-647 1568.

In addition, the Fund discloses, on a monthly basis: (a) a complete schedule of the Master Fund's portfolio holdings; and (b) information regarding the Master Fund's weighted average maturity and weighted average life on UBS's Web site at the following internet address: www.ubs.com/usmoneymarketfunds. In addition, at this location, you will find a link to more detailed Fund information appearing in filings with the SEC on Form N-MFP. Investors also may find additional information about the Fund at the above referenced UBS Website internet address.

Proxy voting policies, procedures and record

You may obtain a description of the Fund's (and corresponding Master Fund's) (1) proxy voting policies, (2) proxy voting procedures and (3) information regarding how a fund voted any proxies related to portfolio securities during the most recent 12-month period ended June 30 for which an SEC filing has been made, without charge, upon request by contacting the Fund directly at 1-800-647 1568, online on UBS's Web site: www.ubs.com/ubsam-proxy, or on the EDGAR Database on the SEC's Web site (<http://www.sec.gov>).

Government Master Fund

Understanding Master Fund's expenses (unaudited)

(Note: The expense information provided in this section is relevant for direct investors in the Master Fund. Investors in the related "feeder fund" should instead focus on separate expense examples relevant to the feeder fund; the expense examples for the feeder fund will reflect its proportionate share of the corresponding Master Fund's expenses.)

As an owner of a Master Fund, an investor such as a feeder fund incurs ongoing costs, including management fees and other Master Fund expenses. These examples are intended to help you understand a Master Fund investor's ongoing costs (in dollars) of investing in a Master Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples below are based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, May 1, 2018 to October 31, 2018.

Actual expenses

The first line in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over a period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses paid during period" to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on the Master Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Master Fund's actual return. The hypothetical account values and expenses may not be used to estimate your actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Master Fund and other funds. To do so, compare these 5% hypothetical examples with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs. Therefore, the second line in the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds, if those other funds impose transactional costs—for example, exchange fees. In addition, if those transactional costs were included, your costs for those other funds would have been higher.

	Beginning account value May 1, 2018	Ending account value October 31, 2018	Expenses paid during period ¹ 05/01/18 to 10/31/18	Expense ratio during the period
Actual	\$1,000.00	\$1,009.40	\$0.51	0.10%
Hypothetical (5% annual return before expenses)	1,000.00	1,024.70	0.51	0.10

¹ Expenses are equal to the Master Fund's annualized net expense ratio, multiplied by the average account value over the period, multiplied by 184 divided by 365 (to reflect the one-half year period).

Portfolio composition²	
US government and agency obligations	74.5%
Repurchase agreements	27.1
Other assets less liabilities	(1.6)
Total	100.0%

¹ The Master Fund's portfolio is actively managed and its weighted average maturity will differ over time.

² Weightings represent percentages of the Master Fund's net assets as of the date indicated. The Master Fund's portfolio is actively managed, and its composition will vary over time.

You could lose money by investing in a money market fund. Although Government Master Fund seeks to preserve the value of your investment so that the shares of each related feeder fund are at \$1.00 per share, Government Master Fund cannot guarantee it will do so. An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any other government agency. A money market fund's sponsor has no legal obligation to provide financial support to a money market fund, and you should not expect that the fund's sponsor will provide financial support to a money market fund at any time.

Not FDIC insured. May lose value. No bank guarantee.

Fair valuation summary

The following is a summary of the fair valuations according to the inputs used as of October 31, 2018 in valuing the Master Fund's investments. In the event a Master Fund holds investments for which fair value is measured using the NAV per share practical expedient (or its equivalent), a separate column will be added to the fair value hierarchy table; this is intended to permit reconciliation to the amounts presented in the Portfolio of investments.

Description	Unadjusted quoted prices in active markets for identical investments (Level 1)	Other significant observable inputs (Level 2)	Unobservable inputs (Level 3)	Total
US government and agency obligations	\$—	\$ 10,523,067,001	\$—	\$ 10,523,067,001
Repurchase agreements	—	3,820,000,000	—	3,820,000,000
Total	\$—	\$14,343,067,001	\$—	\$14,343,067,001

At October 31, 2018, there were no transfers between Level 1 and Level 2.

Portfolio footnotes

¹ Variable or floating rate security. The interest rate shown is the rate in effect as of period end and changes periodically. The maturity date reflects earlier of reset date or stated maturity date.

² Rate shown is the discount rate at the date of purchase unless otherwise noted.

³ Illiquid investment at period end. Illiquid assets, in the amount of \$500,000,000, represented 3.54% of the Fund's net assets at period end.

⁴ Investment has a put feature, which allows the Fund to accelerate the maturity, and a variable or floating rate (the Federal Reserve Overnight Reverse Repo Facility Rate + 0.19%). The interest rate shown is the current rate as of October 31, 2018 and changes periodically. The maturity date reflects early put date and the proceeds represent the face amount of the repurchase agreement plus accrued interest from the date of the last interest payment to the maturity date shown.

Government Master Fund

Notes to financial statements (unaudited)

Organization and significant accounting policies

Government Master Fund (the “Master Fund”) is registered with the US Securities and Exchange Commission (“SEC”) under the Investment Company Act of 1940, as amended (“1940 Act”), as a diversified series of Master Trust, an open-end management investment company organized as a Delaware statutory trust on June 12, 2007. Government Master Fund commenced operations on June 24, 2016.

UBS Asset Management (Americas) Inc. (“UBS AM”) is the investment advisor and administrator for the Master Fund. UBS AM is an indirect wholly owned subsidiary of UBS Group AG. UBS Group AG is an internationally diversified organization with headquarters in Zurich, Switzerland. UBS Group AG operates in many areas of the financial services industry.

Master Trust accounts separately for the assets, liabilities and operations of each series. Expenses directly attributable to each series are charged to that series’ operations; expenses which are applicable to all series are allocated among them on a pro rata basis.

In the normal course of business, the Master Fund may enter into contracts that contain a variety of representations that provide indemnification for certain liabilities. The Master Fund’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Master Fund that have not yet occurred. However, the Master Fund has not had any prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

The Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) is the exclusive reference of authoritative US generally accepted accounting principles (“US GAAP”) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the SEC under authority of federal laws are also sources of authoritative US GAAP for SEC registrants. The Fund’s financial statements are prepared in accordance with US GAAP, which may require the use of management estimates and assumptions. Actual results could differ from those estimates.

In March 2017, the FASB issued Accounting Standards Update 2017-08, Receivables—Nonrefundable Fees and Other Costs (Subtopic 310-20): “Premium Amortization On Purchased Callable Debt Securities” (“ASU 2017-08”). The update provides guidance related to the amortization period for certain purchased callable debt securities held at a premium. ASU 2017-08 will be effective for annual periods beginning after December 15, 2018. Management is currently assessing the potential impact of these changes to future financial statements

In August 2018, the FASB issued Accounting Standards Update 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement (“ASU 2018-13”). The update introduces new fair value disclosure requirements, eliminates some prior fair value disclosure requirements, and modifies certain existing fair value disclosure requirements. ASU 2018-13 will be effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Management is currently assessing the potential impact of these changes to future financial statements.

The following is a summary of significant accounting policies:

Valuation of investments—Under Rule 2a-7 under the 1940 Act, as amended (“Rule 2a-7”), Government Master Fund has adopted a policy to operate as a “government money market fund”. Under Rule 2a-7, a “government money market fund” invests 99.5% or more of its total assets in cash, government securities, and/or repurchase agreements that are collateralized fully (*i.e.*, collateralized by cash and/or government securities). As a “government money market fund”, Government Master Fund values its investments at amortized cost unless the Master Trust’s Board of Trustees (the “Board”) determines that this does not represent fair value. Periodic review and monitoring of the valuation of securities held by Government Master Fund is performed in an effort to ensure that amortized cost approximates market value.

Government Master Fund

Notes to financial statements (unaudited)

The Board has delegated to the Equities, Fixed Income, and Multi-Asset Valuation Committee (“VC”) the responsibility for making fair value determinations with respect to the Master Fund’s portfolio investments. The types of investments for which such fair value pricing may be necessary include, but are not limited to: investments of an issuer that has entered into a restructuring; fixed-income investments that have gone into default and for which there is no current market value quotation; Section 4(a)(2) commercial paper; investments that are restricted as to transfer or resale; illiquid investments; and investments for which the prices or values available do not, in the judgment of the VC, represent current market value. The need to fair value the Master Fund’s portfolio investments may also result from low trading volume in foreign markets or thinly traded investments. Various factors may be reviewed in order to make a good faith determination of an investment’s fair value. These factors include, but are not limited to, fundamental analytical data relating to the investment; the nature and duration of restrictions on disposition of the investment; and the evaluation of forces which influence the market in which the investments are purchased and sold.

The Master Fund’s portfolio holdings may also consist of shares of other investment companies in which the Master Fund invests. The value of each such open-end investment company will generally be its net asset value at the time the Master Fund’s beneficial interests are priced. Pursuant to the Master Fund’s use of the practical expedient within ASC Topic 820, investments in non-registered investment companies and/or investments in investment companies without publicly published prices are also valued at the daily net asset value. Each investment company generally values investments in a manner as described in that investment company’s prospectus or similar documents.

US GAAP requires disclosure regarding the various inputs that are used in determining the value of the Master Fund’s investments. These inputs are summarized into the three broad levels listed below:

Level 1—Unadjusted quoted prices in active markets for identical investments.

Level 2—Other significant observable inputs, including but not limited to, quoted prices for similar investments, interest rates, prepayment speeds and credit risks.

Level 3—Unobservable inputs inclusive of the Master Fund’s own assumptions in determining the fair value of investments.

A fair value hierarchy table has been included near the end of the Master Fund’s Portfolio of investments.

Liquidity fee and/or redemption gates—By operating as a “government money market fund”, Government Master Fund is exempt from requirements that permit the imposition of a liquidity fee and/or temporary redemption gates. While the Board may elect to subject Government Master Fund to liquidity fee and gate requirements in the future, the Board has not elected to do so at this time.

Repurchase agreements—The Master Fund may purchase securities or other obligations from a bank or securities dealer (or its affiliate), subject to the seller’s agreement to repurchase them at an agreed upon date (or upon demand) and price. The Master Fund maintains custody of the underlying obligations prior to their repurchase, either through its regular custodian or through a special “tri-party” custodian or sub-custodian that maintains a separate account for both the Master Fund and its counterparty. The underlying collateral is valued daily in an effort to ensure that the value, including accrued interest, is at least equal to the repurchase price.

Repurchase agreements carry certain risks not associated with direct investments in securities, including a possible decline in the market value of the underlying obligations. If their value becomes less than the repurchase price, plus any agreed-upon additional amount, the counterparty must provide additional collateral so that the collateral is at least equal to the repurchase price plus any agreed-upon additional amount. The difference between the total amount to be received upon repurchase of the obligations and the price that was paid by a fund upon acquisition is

Government Master Fund

Notes to financial statements (unaudited)

accrued as interest and included in its net investment income. In the event of default of the obligation to repurchase, the Master Fund generally has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. Repurchase agreements secured by obligations that are not eligible for direct investment under Rule 2a-7 or a fund's investment strategies and limitations may require the Master Fund to promptly dispose of such collateral if the seller or guarantor becomes insolvent. If the seller (or seller's guarantor, if any) becomes insolvent, the Master Fund may suffer delays, costs and possible losses in connection with the disposition or retention of the collateral. Under certain circumstances, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral may be subject to legal proceedings. The Master Fund intends to enter into repurchase agreements only in transactions with counterparties believed by UBS AM to present minimal credit risk.

The Master Fund may participate in joint repurchase agreement transactions with other funds managed or advised by UBS AM. The Master Fund may engage in repurchase agreements as part of normal investing strategies.

Under certain circumstances, the Master Fund may engage in a repurchase agreement transaction with a yield of zero in order to invest cash amounts remaining in its portfolio at the end of the day in order to avoid having the Master Fund potentially exposed to a fee for uninvested cash held in a business account at a bank.

Investment transactions and investment income—Investment transactions are recorded on the trade date. Realized gains and losses from investment transactions are calculated using the identified cost method. Interest income is recorded on an accrual basis. Discounts are accreted and premiums are amortized as adjustments to interest income and the identified cost of investments.

Concentration of risk—The ability of the issuers of the debt securities held by the Master Fund to meet their obligations may be affected by economic and political developments particular to a specific industry, country, state or region.

Investment advisor and administrator

UBS AM serves as the investment advisor and administrator to the Master Fund pursuant to an investment advisory and administration contract ("Management Contract") approved by the Board. In accordance with the Management Contract, the Master Fund pays UBS AM an investment advisory and administration fee ("management fee"), which is accrued daily and paid monthly, at the below annual rates, as a percentage of the Master Fund's average daily net assets:

Average daily net assets	Annual rate
Up to \$30 billion	0.1000%
In excess of \$30 billion up to \$40 billion	0.0975
In excess of \$40 billion up to \$50 billion	0.0950
In excess of \$50 billion up to \$60 billion	0.0925
Over \$60 billion	0.0900

At October 31, 2018, the Master Fund owed UBS AM for investment advisory and administration services as follows:

Fund	Amount owed to UBS AM
Government Master Fund	\$2,406,737

In exchange for these fees, UBS AM has agreed to bear all of the Master Fund's expenses other than taxes, extraordinary costs and the cost of securities purchased and sold by the Master Fund, including any transaction costs. Although UBS AM is not obligated to pay the fees and expenses of the Master Fund's independent trustees, it is contractually obligated to reduce its management fee in an amount equal to those fees and expenses. UBS AM

Government Master Fund

Notes to financial statements (unaudited)

estimates that these fees and expenses will be 0.01% or less of the Master Fund's average daily net assets. At October 31, 2018, UBS AM did not owe the Master Fund any additional reductions in management fees for independent trustees' fees and expenses.

In addition, UBS AM may voluntarily undertake to waive fees in the event that Master Fund yields drop below a certain level. This additional undertaking is voluntary and not contractual and may be terminated at any time. At October 31, 2018, and during the period ended October 31, 2018, UBS AM did not owe and/or waive fees under such an additional fee waiver undertaking. Such waived fees are not subject to future recoupment.

Additional information regarding compensation to affiliate of a board member

Professor Meyer Feldberg serves as a senior advisor to Morgan Stanley, a financial services firm with which the Master Fund may conduct transactions, resulting in him being considered an interested trustee of the Master Fund. The Master Fund has been informed that Professor Feldberg's role at Morgan Stanley does not involve matters directly affecting any UBS funds. Portfolio transactions are executed through Morgan Stanley based on that firm's ability to provide best execution of the transactions. During the period ended October 31, 2018, the Master Fund did not purchase or sell certain securities (e.g., fixed income securities) in principal trades with Morgan Stanley.

If any such transactions had occurred, Morgan Stanley would have received compensation in connection with such trades, which may have been in the form of a "mark-up" or "mark-down" of the price of the securities or some other form of compensation. Although the precise amount of this compensation is not generally known by the Master Fund's investment manager, it is believed that under normal circumstances it represents a small portion of the total value of the transactions.

Beneficial interest transactions

	For the six months ended October 31, 2018	For the year ended April 30, 2018
Contributions	\$ 20,158,172,417	\$ 41,851,410,669
Withdrawals	(21,861,798,352)	(43,723,358,147)
Net decrease in beneficial interest	\$ (1,703,625,935)	\$ (1,871,947,478)

Federal tax status

Government Master Fund is considered a non-publicly traded partnership for federal income tax purposes under the Internal Revenue Code; therefore, no federal tax provision is necessary. As such, each investor in the Master Fund is treated as owning its proportionate share of the net assets, income, expenses, and realized and unrealized gains and losses of the Master Fund. UBS AM intends that the Master Fund's assets, income and distributions will be managed in such a way that an investor in the Master Fund will be able to continue to qualify as a regulated investment company by investing its net assets through the Master Fund.

ASC 740-10 "Income Taxes—Overall" sets forth a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken. The Fund has conducted an analysis and concluded, as of October 31, 2018, that there are no significant uncertain tax positions taken or expected to be taken that would require recognition in the financial statements. The Master Fund recognizes interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statement of operations. During the period ended October 31, 2018, the Fund did not incur any interest or penalties.

Each of the tax years since the Fund's inception in June 2016, remains subject to examination by the Internal Revenue Service and state taxing authorities.

Government Master Fund

General information (unaudited)

Monthly and quarterly portfolio holdings disclosure

The Master Fund will file its complete schedule of portfolio holdings with the US Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. The Master Fund's Forms N-Q are available on the SEC's Web site at <http://www.sec.gov>. The Master Fund's Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC 0330. Additionally, you may obtain copies of Forms N-Q from the Master Fund upon request by calling 1-800-647 1568.

In addition, the Master Fund discloses, on a monthly basis: (a) a complete schedule of its portfolio holdings; and (b) information regarding its weighted average maturity and weighted average life on UBS's Web site at the following internet address: www.ubs.com/usmoneymarketfunds. In addition, at this location, you will find a link to more detailed Fund information appearing in filings with the SEC on Form N-MFP.

Proxy voting policies, procedures and record

You may obtain a description of the Master Fund's (1) proxy voting policies, (2) proxy voting procedures and (3) information regarding how the Master Fund voted any proxies related to portfolio securities during the most recent 12-month period ended June 30 for which an SEC filing has been made, without charge, upon request by contacting the Master Fund directly at 1-800-647 1568, online on UBS's Web site: www.ubs.com/ubsam-proxy, or on the EDGAR Database on the SEC's Web site (<http://www.sec.gov>).

Government Master Fund

Board approval of investment advisory agreement (unaudited)

Background—At a meeting of the board of Master Trust (the “Trust”) on July 17-18, 2018, the members of the board, including the trustees who are not “interested persons” of the Trust (“Independent Trustees”), as defined in the Investment Company Act of 1940, as amended (the “1940 Act”), considered and approved the continuance of the management contract (the “Management Contract”) between UBS Asset Management (Americas) Inc. (“UBS AM”) and the Trust, with respect to Government Master Fund (the “Master Fund”), a series of the Trust. In preparing for the meeting, the Independent Trustees had requested and received extensive information from UBS AM to assist them, including information about UBS AM, as well as the advisory, administrative and distribution arrangements for the Master Fund. The board reviewed and discussed with management the materials initially provided by UBS AM prior to the scheduled board meeting. The Independent Trustees also met in executive session to review the disclosure that had been made to them. At these sessions the Independent Trustees were joined by their independent legal counsel. The Independent Trustees also received a memorandum from their independent legal counsel discussing the duties of board members in considering the approval of advisory and administration agreements.

In its consideration of the approval of the Management Contract, the board reviewed the following factors:

Nature, extent and quality of the services under the Management Contract—The board received and considered information regarding the nature, extent and quality of management services provided to the Master Fund by UBS AM under the Management Contract. The board also considered the nature, extent and quality of administrative, distribution, and shareholder services performed by UBS AM and its affiliates for the Master Fund and the corresponding SEC-registered “feeder funds” that invest in the Master Fund (the “Feeder Funds”). The board noted that it received information at regular meetings throughout the year regarding the services rendered by UBS AM concerning the management of the Master Fund’s and each Feeder Fund’s affairs and UBS AM’s role in coordinating and overseeing providers of other services to the Master Fund and the Feeder Funds. The board’s evaluation of the services provided by UBS AM took into account the board’s knowledge and familiarity gained as board members of funds in the UBS New York fund complex, including the scope and quality of UBS AM’s investment advisory and other capabilities and the quality of its administrative and other services. The board observed that the scope of services provided by UBS AM had expanded over time as a result of regulatory and other developments, including maintaining and monitoring its own and the Master Fund’s and the Feeder Funds’ expanded compliance programs.

The board had available to it the qualifications, backgrounds and responsibilities of the senior personnel at UBS AM responsible for the Master Fund and the Feeder Funds and had previously met with and received information regarding the persons primarily responsible for their day-to-day management. The board recognized that several senior personnel at UBS AM report to the board regularly and that at each regular meeting the board receives a detailed report from UBS AM on the Master Fund’s and each Feeder Fund’s performance. The board also considered, based on its knowledge of UBS AM and its affiliates, the financial resources available to UBS AM and its parent organization, UBS Group AG. In that regard, the board received extensive financial information regarding UBS AM and noted that it was a wholly owned, indirect subsidiary of one of the largest financial services firms in the world. It also was noted that UBS AM had approximately \$174 billion in assets under management as of March 31, 2018 and was part of the UBS Asset Management Division, which had approximately \$831 billion in assets under management worldwide as of March 31, 2018. The board also was cognizant of, and considered, the regulatory and litigation actions and investigations occurring in the past few years involving UBS Group AG, UBS AM and certain of their affiliates.

The board concluded that, overall, it was satisfied with the nature, extent and quality of services provided (and expected to be provided) under the Management Contract.

Management fees and expense ratios—In conducting its review, the board noted that under the master-feeder structure, the Master Fund pays an investment advisory and administration fee (the “Contractual Management Fee”) to UBS AM, and, in turn, each Feeder Fund bears the Master Fund’s expenses in proportion to its investment in the

Government Master Fund

Board approval of investment advisory agreement (unaudited)

Master Fund. Therefore, in making its determination regarding the Master Fund's fees, the board assessed (i) the Master Fund's Contractual Management Fee, Actual Management Fee (defined below) and overall expenses, (ii) each Feeder Fund's portion of the Master Fund's Contractual Management Fee and Actual Management Fee (defined below), and (iii) each Feeder Fund's overall expenses.

In addition to reviewing each Feeder Fund's portion of the Master Fund's Contractual Management Fee, the board also reviewed and considered any fee waiver and/or expense reimbursement arrangement and considered the actual fee rate (after taking any waivers and/or reimbursements into account) (the "Actual Management Fee"). The board noted that management proposed to extend the contractual fee waiver and/or expense reimbursement arrangements in place for the Select Government Preferred Feeder Fund, Select Government Investor Feeder Fund and Select Government Capital Feeder Fund through August 31, 2019. The board also noted that management would pass through to the benefit of the Select Government Investor Feeder Fund certain waivers from financial intermediaries. With respect to a number of the Feeder Funds, the board also took note of UBS AM's additional voluntary undertakings to waive fees/reimburse expenses as part of "yield flooring." The board noted that such additional voluntary waiver/reimbursement arrangements are not contractually imposed and could change or terminate at any time and varied for particular Feeder Funds over the periods examined.

The board also received and considered information comparing the Master Fund's Contractual Management Fee, Actual Management Fee and overall expenses and each Feeder Fund's portion of the Master Fund's Contractual Management Fee and Actual Management Fee and each Feeder Fund's overall expenses with those of funds in a group of funds selected and provided by Broadridge ("Broadridge"), an independent provider of investment company data (the "Expense Group"). With respect to Select Government Investor Feeder Fund, the board also received from Broadridge comparative data on a supplemental expense group of funds selected based on feeder fund asset size instead of master fund asset size (the "Supplemental Expense Group").

In connection with its consideration of the management fees, the board also received information from UBS AM with respect to fees paid by institutional or separate accounts; however, in management's view, such fee information was not very relevant to the Master Fund because, among other reasons, separately managed and institutional accounts with a "cash" mandate (a) were not subject to all of the constraints of Rule 2a-7 under the 1940 Act to which the Master Fund is subject and (b) do not involve the management responsibilities attendant to the operation of a 1940 Act regulated fund, and, therefore, were not totally comparable. The board also received information on fees charged to other mutual funds managed by UBS AM.

The comparative Broadridge information showed that, with the exception of the Select Government Institutional Feeder Fund's, Select Government Capital Feeder Fund's and RMA Government Money Market Feeder Fund's Actual Management Fees and RMA Government Money Market Feeder Fund's total expenses, the Master Fund's Contractual Management Fee, Actual Management Fee and overall expenses were all at or below its corresponding Expense Group median with the related Feeder Funds' fees taken into account. (Below median fees or expenses represent fees or expenses that are lower relative to the median, and above median fees or expenses represent fees or expenses that are higher relative to the median of the funds in the applicable Expense Group.)

Management noted that while the Select Government Institutional Feeder Fund's Actual Management Fee was above the Expense Group median by 7 basis points (*i.e.*, 0.07%), the Select Government Institutional Feeder Fund's Contractual Management Fee and total expenses each were at the applicable Expense Group median. Management also noted that while the Select Government Capital Feeder Fund's Actual Management Fee was above the Expense Group median by 2 basis points (*i.e.*, 0.02%), the Select Government Capital Feeder Fund's Contractual Management Fee and total expenses each were below the applicable Expense Group median. Management explained that these differentials were largely the result of the phase out of voluntary management fee waivers during the period, as the level of those waivers and the timing of their phase out varies and creates inconsistency when comparing management fees within the relevant Expense Group, especially where the Expense Group peers have different

Government Master Fund

Board approval of investment advisory agreement (unaudited)

financial reporting periods. Management also stated that the Select Government Institutional Feeder Fund has a “unitary” fee structure, unlike many of the Expense Group peers.

Management explained that the RMA Government Money Market Feeder Fund’s higher relative Actual Management Fee and total expenses were primarily due to the Expense Group classification, but also may be impacted by the phase out of voluntary fee waivers during the period. Management noted that the RMA Government Money Market Feeder Fund, unlike most of its Expense Group, was designed to be offered and utilized as a sweep fund for brokerage accounts. As a result, the RMA Government Money Market Feeder Fund was likely to have a higher fee structure and a greater number of shareholders—resulting in higher transfer agency fees—compared to the non-sweep peers in the Expense Group that were likely to have a lower fee structure and fewer shareholders. Finally, Management noted that in comparison to a supplemental expense group of similar sweep money market funds identified by UBS AM, the RMA Government Money Market Feeder Fund’s Actual Management Fee was above the median by less than 2 basis points (*i.e.*, 0.02%) and its total expenses were below the median by nearly 9 basis points (*i.e.*, 0.09%).

In light of the foregoing, the board determined that the management fees for the Master Fund were reasonable in light of the nature, extent and quality of services provided to the Master Fund under the Management Contract.

Fund performance—In considering the Master Fund’s performance, the board received and considered (a) annualized total return information of each Feeder Fund compared to other funds (the “Performance Universe”) selected by Broadridge over the one-, three-, five- and ten-year (or shorter) periods, as applicable to a Feeder Fund, and since inception, in each case ended April 30, 2018 and (b) annualized performance information for each year in the ten-year period ended April 30, 2018. Although the board received information for the ten-year and since inception periods, in its analysis, it generally placed greater emphasis on the one-, three- and five-year periods. The board was provided with a description of the methodology Broadridge used to determine the similarity of each Feeder Fund with the funds included in its Performance Universe. The board noted that each Feeder Fund’s performance is correlated with the Master Fund’s performance, with the only difference being the administrative, distribution and shareholder service fees or other expenses paid at the Feeder Fund level.

The comparative Broadridge information showed that the performance of the RMA Government Money Market Feeder Fund, the Select Government Preferred Feeder Fund and the Select Government Capital Feeder Fund, which each commenced operations in June 2016, the Select Government Institutional Feeder Fund, which commenced operations in July 2016, and the Select Government Investor Feeder Fund, which commenced operations in August 2016, was above its corresponding Performance Universe median for the one-year period and since inception. (Below median performance represents performance that is worse relative to the median and above median performance represents performance that is better relative to the median.)

Based on its review, the board concluded that the Master Fund’s investment performance was acceptable.

Advisor profitability—The board received and considered a profitability analysis of UBS AM and its affiliates in providing services to the Master Fund and the Feeder Funds. The board also received profitability information with respect to the UBS New York fund complex as a whole. UBS AM’s profitability was considered not excessive in light of the nature, extent and quality of the services provided to the Master Fund and the Feeder Funds.

Economies of scale—The board received and considered information from management regarding whether UBS AM realized economies of scale as the Master Fund’s assets grew, whether the Master Fund had appropriately benefited from any economies of scale, and whether there is potential for realization of any further economies of scale for the Master Fund. The board considered whether economies of scale in the provision of services to the Master Fund were being passed along to the Feeder Funds’ shareholders.

Government Master Fund

Board approval of investment advisory agreement (unaudited)

The board noted that although the Master Fund's Contractual Management Fee contained breakpoints at higher asset levels, economies of scale might inure more to UBS AM because UBS AM paid most of the Master Fund's non-management operating expenses under the "unitary" fee structure. Overall, the board considered the sharing of economies of scale with the shareholders of the Feeder Funds acceptable.

Other benefits to UBS AM—The board considered other benefits received by UBS AM and its affiliates as a result of its relationship with the Master Fund and the Feeder Funds, including the opportunity to offer additional products and services to the Feeder Funds' shareholders and to others. In light of the costs of providing investment advisory, administrative and other services to the Master Fund, the costs of providing administrative services to the Feeder Funds and UBS AM's ongoing commitment to the Master Fund and the Feeder Funds, the profits and other ancillary benefits that UBS AM and its affiliates received were considered reasonable.

Government Master Fund

Board approval of investment advisory agreement (unaudited)

In light of all of the foregoing, the board, including a majority of the Independent Trustees, approved the Management Contract. No single factor reviewed by the board was identified by the board as the principal factor in determining whether to approve the Management Contract. The Independent Trustees were advised by separate independent legal counsel throughout the process. The board discussed the proposed continuance of the Management Contract in private sessions with their independent legal counsel at which no representatives of UBS AM were present.
