

Money Market Funds

Statement of Additional Information | March 11, 2024 (as revised April 15, 2024)

787 Seventh Avenue,
New York, NY 10019

Includes:

- UBS Select 100% US Treasury Institutional Fund
- UBS Select 100% US Treasury Preferred Fund

The two funds named above (together, the “funds”) are diversified series of UBS Series Funds (the “Trust”), a professionally managed open-end investment company. Each fund is a “feeder fund” that invests all of its assets in a corresponding master fund (the “master fund”) with the same objective as the fund.

UBS Asset Management (Americas) LLC (“UBS AM”) is the investment adviser and administrator for the master fund and the administrator for the feeder funds. UBS Asset Management (US) Inc. (“UBS AM (US)”) serves as principal underwriter for the funds. UBS AM and UBS AM (US) are indirect wholly owned subsidiaries of UBS Group AG.

This SAI is not a prospectus and should be read only in conjunction with the respective funds’ current prospectuses dated March 11, 2024 (as revised April 15, 2024). A copy of a prospectus may be obtained by calling a financial intermediary through which shares may be purchased or by calling toll-free 1-888-547 FUND. The prospectus also contains more complete information about the relevant fund. You should read it carefully before investing. This SAI is dated March 11, 2024 (as revised April 15, 2024).

The funds and their investment policies

Each fund's investment objective is non-fundamental and may be changed by the fund's board at any time without shareholder approval. Except where noted, the investment policies of each fund may be changed by its board without shareholder approval.

Each fund invests in securities through an underlying master fund. Each fund and its corresponding master fund have the same objective. Unless otherwise indicated, references to a fund include its corresponding master fund. As with other mutual funds, there is no assurance that a fund will achieve its investment objective.

Each fund is a money market fund and seeks to maintain a stable price of \$1.00 per share using amortized cost-based pricing. Each fund invests in high quality money market instruments that have, or are deemed to have, remaining maturities of 13 months or less. Money market instruments include short-term debt-obligations and similar securities. They also include longer term securities that have variable interest rates or other special features that give them the financial characteristics of short-term debt. Each fund maintains a dollar-weighted average portfolio maturity of 60 days or less; each fund maintains a dollar-weighted average life for its portfolio of 120 days or less.

Each fund may purchase only those obligations that UBS AM determines, pursuant to procedures adopted by the board, are "eligible securities" as defined in Rule 2a-7 under the Investment Company Act of 1940, as amended ("Investment Company Act").

Each fund's investment objective is to earn maximum current income consistent with liquidity and the preservation of capital. Under normal circumstances, each fund invests exclusively in a diversified portfolio of high quality, US Treasury money market instruments and may also hold cash. Money market instruments generally are short-term debt obligations and similar securities. They also may include longer-term bonds that have variable interest rates or other special features (e.g., a put option) that give them the financial characteristics of short-term debt. Many US government money market instruments pay income that is generally exempt from state and local income tax, although they may be subject to corporate franchise tax in some states. Each fund may hold cash, including cash earning interest held at the fund's custodian. Each fund generally seeks to invest in securities the income from which is considered "qualified interest income" under relevant tax law and guidance.

The funds' board has determined that each fund will operate as a "government money market fund" under Rule 2a-7 of the Investment Company Act. Therefore, each fund has adopted a policy to invest 99.5% or more of its total assets in cash, government securities, and/or repurchase agreements that are collateralized fully (*i.e.*, collateralized with cash and/or government securities); however, as noted above, the fund expects to further limit its investments, and under normal circumstances, the fund invests exclusively in a diversified portfolio of high quality, US Treasury money market instruments and may also hold cash. As a "government money market fund" under Rule 2a-7, each fund (1) is permitted to use the amortized cost method of valuation to seek to maintain a \$1.00 share price, and (2) is not subject to a liquidity fee which might apply to other types of funds under certain circumstances. (In conformance with Rule 2a-7, each fund's board has reserved its ability to change this policy, but such change would only become effective after shareholders were provided with specific advance notice of a change in the fund's policy and have the opportunity to redeem their shares in accordance with Rule 2a-7 before the policy change became effective.)

Each fund will not acquire any illiquid security (as defined below) if, immediately after the acquisition, the fund would have invested more than 5% of its total assets in illiquid securities. Each fund also will comply with the daily and weekly liquidity requirements set forth in Rule 2a-7 of the Investment Company Act and, as such, must maintain a portion of its assets in cash or securities that can readily be converted into cash, which may have a negative effect on the fund's yield. Each fund may purchase securities on a when-issued or delayed delivery basis in accordance with Rule 18f-4. Each fund may lend its portfolio securities to qualified broker-dealers or institutional investors in an amount up to 33 ⅓% of its total assets. Each fund may borrow from banks or through reverse repurchase agreements for temporary purposes, but not in excess of 33 ⅓% of its total assets. The costs associated with

borrowing may reduce each fund's net income. See "The funds' investments, related risks and limitations—Investment limitations of the funds" for more information regarding borrowing. Each fund may invest in the securities of other investment companies, including money market funds advised by UBS AM.

The funds' investments, related risks and limitations

The following supplements the information contained in the relevant fund's prospectus and above concerning each fund's investments, related risks and limitations. Except as otherwise indicated in the prospectus or the SAI, the funds have established no policy limitations on their ability to use the investments or techniques discussed in these documents. New forms of money market instruments continue to be developed. The funds, through their corresponding master fund, may invest in these instruments to the extent consistent with their investment objectives and strategies.

Yields and quality of money market instruments. The yields on the money market instruments in which the funds invest are dependent on a variety of factors, including general money market conditions, conditions in the particular market for the obligation, the financial condition of the issuer, the size of the offering, the maturity of the obligation and the ratings of the issue. The ratings assigned by rating agencies represent their opinions as to the quality of the obligations they undertake to rate. Ratings, however, are general and are not absolute standards of quality. Consequently, obligations with the same rating, maturity and interest rate may have different market prices.

Subsequent to its purchase, a security held by a fund may experience a default, cease to be an eligible security (e.g., no longer presents minimal credit risks), or an event of insolvency may occur with respect to the issuer. In such cases, a fund will dispose of the security as soon as practicable consistent with achieving an orderly disposition of the security, by sale, exercise of any demand feature or otherwise, absent a finding by the fund's board that disposal of the security would not be in the best interests of the fund (which determination may take into account, among other factors, market conditions that could affect the orderly disposition of the security).

US Government securities. US government securities include direct obligations of the US Treasury (such as Treasury bills, notes or bonds) and obligations issued or guaranteed as to principal and interest (but not as to market value) by the US government, its agencies or its instrumentalities. These US government securities may include mortgage-backed securities issued or guaranteed by government agencies or government-sponsored enterprises, that are not guaranteed or insured by the US government. Other US government securities may be backed by the full faith and credit of the US government or supported primarily or solely by the creditworthiness of the government-related issuer or, in the case of mortgage-backed securities, by pools of assets.

Securities issued by agencies and instrumentalities of the US government that are supported by the full faith and credit of the United States, such as securities issued by the Federal Housing Administration and the Government National Mortgage Association, present little credit risk. Other securities issued by agencies and instrumentalities sponsored by the US government that are supported only by the issuer's right to borrow from the US Treasury, subject to certain limitations, such as securities issued by Federal Home Loan Banks, and securities issued by agencies and instrumentalities sponsored by the US government that are supported only by the credit of the issuing agencies are subject to a greater degree of credit risk. The Federal Home Loan Mortgage Corporation ("Freddie Mac") and the Federal National Mortgage Association ("Fannie Mae") historically were agencies sponsored by the US government that were supported by the credit of the issuing agencies and not backed by the full faith and credit of the United States. However, on September 7, 2008, due to the value of Freddie Mac's and Fannie Mae's securities falling sharply and concerns that the firms did not have sufficient capital to offset losses resulting from the mortgage crisis, the Federal Housing Finance Agency ("FHFA") placed Freddie Mac and Fannie Mae into conservatorship and stepped into the shoes of and succeeded to all of the rights of their shareholders. In addition to the conservatorship, the US government has taken various steps to provide additional financial support to Freddie Mac and Fannie Mae, including

by having the FHFA (as conservator of Fannie Mae and Freddie Mac) enter into an agreement with the US Treasury to provide financial support in exchange for Senior Preferred Stock and warrants to purchase common stock of the entities. The actions of the US government were intended to assist Freddie Mac and Fannie Mae in maintaining a positive net worth and meeting their financial obligations. Although the US government provided financial support to such entities, no assurance can be given that it will always do so.

The future for Fannie Mae and Freddie Mac is uncertain. Under a letter agreement between the FHFA (in its role as conservator) and the US Treasury, the FHFA is prohibited from removing its conservatorship of each enterprise until all litigation regarding the conservatorship has ended and each enterprise has retained equity capital levels equal to three percent of their total assets. It is unclear how long it will be before the FHFA will be able to remove its conservatorship of the enterprises under this letter agreement. The FHFA has indicated that the conservatorship of each enterprise will end when the director of FHFA determines that FHFA's plan to restore the enterprise to a safe and solvent condition has been completed. The FHFA's 2022 report to Congress on the conservatorships noted that, under amendments to the Enterprise Regulatory Capital Framework ("ERCF"), Fannie Mae and Freddie Mac published their first capital disclosures in the first quarter of 2023 and delivered their first capital plans to FHFA in May 2023. Should Fannie Mae and Freddie Mac be taken out of conservatorship, it is unclear whether the US Treasury would continue to enforce its rights or perform its obligations under the Senior Preferred Stock Purchase Agreement. It is also unclear how the capital structure of Fannie Mae and Freddie Mac would be constructed post-conservatorship, and what effects, if any, the privatization of Fannie Mae and Freddie Mac will have on their creditworthiness and guarantees of certain mortgage-backed securities. The ERCF requires Fannie Mae and Freddie Mac, upon exit from conservatorship, to maintain higher levels of capital than prior to conservatorship to satisfy their risk-based capital requirements, leverage ratio requirements, and prescribed buffer amounts. Accordingly, should the FHFA take Fannie Mae and Freddie Mac out of conservatorship, there could be an adverse impact on the value of their securities which could cause a fund's investments to lose value. The US Congress and the executive branch, including the US Treasury and the FHFA, continue to evaluate proposals to reduce the US government's role in the mortgage market, including to take Fannie Mae and Freddie Mac out of conservatorship, wind down, restructure, consolidate, or privatize Fannie Mae and Freddie Mac. Should the US government adopt any such proposal, or should the FHFA take Fannie Mae and Freddie Mac out of conservatorship, the value of investments in securities issued by Fannie Mae or Freddie Mac may be impacted.

US government securities also include separately traded principal and interest components of securities issued or guaranteed by the US Treasury, which are traded independently under the Separate Trading of Registered Interest and Principal of Securities ("STRIPS") program. Under the STRIPS program, the principal and interest components are individually numbered and separately issued by the US Treasury.

On June 3, 2019, under the FHFA's "Single Security Initiative", Fannie Mae and Freddie Mac started issuing uniform mortgage-backed securities ("UMBS"). The Single Security Initiative seeks to align the characteristics of certain Fannie Mae and Freddie Mac mortgage-backed securities and to support the overall liquidity in certain markets. In addition, Freddie Mac has offered investors the opportunity to exchange outstanding legacy mortgage-backed securities for mirror UMBS. The effects that the Single Security Initiative may have on the market and other mortgage-backed securities are uncertain.

Any controversy or ongoing uncertainty regarding the status of negotiations in the US Congress to increase the statutory debt ceiling could increase the risk that the US government may default on payments on certain US government securities, including those held by the funds, which could have a material adverse impact on the funds. The long-term US credit rating has been subject to downgrades by multiple major credit rating agencies since 2011, in part as a result of disagreements within the US government over raising the debt ceiling to repay outstanding obligations, and similar situations in the future could increase volatility in both stock and bond markets, result in higher interest rates, lower prices of US Treasury securities and increase the costs of different kinds of debt. It is at least theoretically possible that under certain scenarios the US government could default on its debt, including US Treasuries. UBS AM cannot predict the effects of these or similar events in the future on the US economy and securities markets or on a fund's portfolio.

Variable and floating rate securities and demand instruments. Each fund may purchase variable and floating rate securities with remaining maturities in excess of 13 months issued by US government agencies or instrumentalities or guaranteed by the US government. The yields on these securities are adjusted in relation to changes in specific rates, such as the prime rate, and different securities may have different adjustment rates. Certain of these obligations carry a demand feature that gives a fund the right to tender them back to a specified party, usually the issuer or a remarketing agent, prior to maturity. A fund's investments in variable and floating rate securities must comply with conditions established by the SEC under which they may be considered to have remaining maturities of 13 months or less. See "The funds' investments, related risks and limitations—Credit and liquidity enhancements."

Generally, a fund may exercise demand features (1) upon a default under the terms of the underlying security, (2) to maintain its portfolio in accordance with its investment objective and policies or applicable legal or regulatory requirements or (3) as needed to provide liquidity to the fund in order to meet redemption requests. The ability of a bank or other financial institution to fulfill its obligations under a letter of credit, guarantee or other liquidity arrangement might be affected by possible financial difficulties of its borrowers, adverse interest rate or economic conditions, regulatory limitations or other factors. The interest rate on floating rate or variable rate securities ordinarily is readjusted on the basis of the prime rate of the bank that originated the financing or some other index or published rate, such as the 90-day US Treasury bill rate, or is otherwise reset to reflect market rates of interest. Generally, these interest rate adjustments cause the market value of floating rate and variable rate securities to fluctuate less than the market value of fixed rate securities.

LIBOR discontinuance or unavailability risk. Certain of the funds' investments and payment obligations may be (or previously were) based on the London Interbank Offer Rate ("LIBOR"). LIBOR was a leading floating rate benchmark used in loans, notes, derivatives and other instruments or investments. As a result of benchmark reforms, publication of most LIBOR settings has ceased. Some LIBOR settings continue to be published, but only on a temporary, synthetic and non-representative basis. Regulated entities have generally ceased entering into new LIBOR contracts in connection with regulatory guidance or prohibitions. A fund may continue to invest in instruments that continue to reference LIBOR or otherwise use LIBOR reference rates due to favorable liquidity or pricing, however, new LIBOR assets may no longer be available.

Regulators and market participants have been working together to identify or develop successor reference rates and necessary adjustments to associated spreads (i.e., the amounts above the relevant reference rates paid by borrowers in the market) (if any). Replacement rates that have been identified include the Secured Overnight Financing Rate ("SOFR"), which is intended to replace US dollar LIBOR and measures the cost of overnight borrowings through repurchase agreement transactions collateralized with US Treasury securities, and the Sterling Overnight Index Average Rate ("SONIA"), which is intended to replace GBP LIBOR and measures the overnight interest rate paid by banks for unsecured transactions in the sterling market, although other replacement rates could be adopted by market participants. At this time, it is not possible to predict the effect of the establishment of SOFR, SONIA or any other replacement rates.

Additionally, industry trade associations and participants are focusing on the transition mechanisms by which reference rates (including LIBOR) and spreads (if any) in existing contracts or instruments may be amended, whether through market-wide protocols, fallback contractual provisions, bespoke negotiations or amendments or otherwise. Various pieces of legislation, including enacted legislation from the states of New York and Alabama and the US Congress, may have affected the transition of LIBOR-based instruments as well by permitting trustees and calculation agents to transition instruments without effective LIBOR fallback language to a successor reference rate. Such pieces of legislation also include safe harbors from liability, which may limit the recourse a holder may have if the successor reference rate does not fully compensate that holder for the transition of an instrument from LIBOR. It is uncertain what impact any such legislation may have. Notwithstanding the foregoing, some instruments continue to use synthetic LIBOR settings. These instruments may transition to another floating rate index after LIBOR ceases to be published. The LIBOR transition may have an impact on the value and liquidity of all floating rate instruments.

Alteration of the terms of a debt instrument or a modification of the terms of other types of contracts to replace LIBOR or another interbank offered rate ("IBOR") with a new reference rate could result in a taxable exchange and the realization of income and gain/loss for US federal income tax purposes. The Internal Revenue Service has issued final regulations regarding the tax consequences of the transition from IBOR to a new reference rate in debt instruments and non-debt contracts. Under the final regulations, alteration or modification of the terms of a debt instrument to replace an operative rate that uses a discontinued IBOR with a qualified rate (as defined in the final regulations) including true up payments equalizing the fair market value of contracts before and after such IBOR transition, to add a qualified rate as a fallback rate to a contract whose operative rate uses a discontinued IBOR or to replace a fallback rate that uses a discontinued IBOR with a qualified rate would not be taxable. The Internal Revenue Service may provide additional guidance, with potential retroactive effect.

At this time, it is not possible to exhaustively identify or predict the effect of any changes to reference rates, any establishment of alternative reference rates or any other reforms to reference rates. The elimination of LIBOR or reforms to the determination or supervision of reference rates may affect the value, liquidity or return on, and may cause increased volatility in markets for, certain fund investments and may result in costs incurred in connection with closing out positions and entering into new trades, adversely impacting a fund's overall financial condition or results of operations. In the event that a floating rate benchmark is discontinued, UBS AM and/or its affiliates may have discretion to determine a successor or substitute reference rate, including any price or other adjustments to account for differences between the successor or substitute reference rate and the previous rate. Such successor or substitute reference rate and any adjustments selected may negatively impact the fund's investments, performance or financial condition, and may expose the fund to additional tax, accounting and regulatory risks.

Illiquid securities. The term "illiquid securities" means securities that cannot be sold or disposed of in the ordinary course of business within seven calendar days at approximately the amount at which a fund has valued the securities and includes, among other things, repurchase agreements maturing in more than seven days and restricted securities other than those UBS AM has determined are liquid pursuant to guidelines established by a fund's board. A fund may not be able to readily liquidate its investments in illiquid securities and may have to sell other investments if necessary to raise cash to meet its obligations. The lack of a liquid secondary market for illiquid securities may make it more difficult for a fund to assign a value to those securities for purposes of valuing its portfolio and calculating its net asset value.

Restricted securities are not registered under the Securities Act of 1933, as amended ("Securities Act"), and may be sold only in privately negotiated or other exempted transactions or after a registration statement under the Securities Act has become effective. Where registration is required, a fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, a fund might obtain a less favorable price than that which prevailed when it decided to sell.

Not all restricted securities are illiquid. A large institutional market has developed for many US and non-US securities that are not registered under the Securities Act. Institutional investors generally will not seek to sell these instruments to the general public, but instead will often depend either on an efficient institutional market in which such unregistered securities can be readily resold or on an issuer's ability to honor a demand for repayment. Therefore, the fact that there are contractual or legal restrictions on resale to the general public or certain institutions is not dispositive of the liquidity of such investments.

Institutional markets for restricted securities also have developed as a result of Rule 144A under the Securities Act, which establishes a "safe harbor" from the registration requirements of the Securities Act for resales of certain securities to qualified institutional buyers. These markets include automated systems for the trading, clearance and settlement of unregistered securities of US and non-US issuers, such as the PORTAL System sponsored by the Financial Industry Regulatory Authority (previously, the National Association of Securities Dealers, Inc. ("FINRA")). An

insufficient number of qualified institutional buyers interested in purchasing Rule 144A-eligible restricted securities held by a fund, however, could affect adversely the marketability of such portfolio securities, and the fund might be unable to dispose of them promptly or at favorable prices.

The board has delegated the function of making day-to-day determinations of liquidity to UBS AM pursuant to guidelines approved by the board. UBS AM takes into account a number of factors in reaching liquidity decisions, which may include (1) the frequency of trades for the security, (2) the number of dealers that make quotes, or are expected to make quotes, for the security, (3) the nature of the security and how trading is effected (e.g., the time needed to sell the security, how bids are solicited and the mechanics of transfer) and (4) the existence of demand features or similar liquidity enhancements. UBS AM monitors the liquidity of restricted securities in each fund's portfolio and reports periodically on such decisions to the board.

UBS AM also monitors each fund's overall holdings of illiquid securities. If a fund's holdings of illiquid securities exceed its limitation on investments in illiquid securities for any reason (such as a particular security becoming illiquid, changes in the relative market values of portfolio securities or shareholder redemptions), UBS AM will consider what action would be in the best interests of the fund and its shareholders. Such action may include engaging in an orderly disposition of securities to reduce the fund's holdings of illiquid securities. However, a fund is not required to dispose of illiquid securities under these circumstances.

Reverse repurchase agreements. Reverse repurchase agreements involve the sale of securities held by the fund subject to its agreement to repurchase the securities at an agreed-upon date or upon demand and at a price reflecting a market rate of interest. Reverse repurchase agreements are subject to the fund's limitation on borrowings and may be entered into only with banks or securities dealers or their affiliates. Reverse repurchase agreements involve the risk that the buyer of the securities sold by the fund might be unable to deliver them when the fund seeks to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the buyer or trustee or receiver may receive an extension of time to determine whether to enforce the fund's obligation to repurchase the securities, and the fund's use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

Counterparty risk. A fund may be exposed to the risk of financial failure or insolvency of another party. To help lessen those risks, UBS AM and/or its affiliates, subject to the supervision of the board, monitors and evaluates the creditworthiness of the parties with which a fund does business.

Operations risk. Each fund is subject to the risk that it may not be able to complete a transaction in the manner or at the time desired or other potential operational issues because of difficulties with the settlement process or other functions related to the processing of securities transactions. Such risks may arise from factors such as processing errors, human errors, inadequate or failed internal or external processes and controls, failures in systems and technology, documentation issues, changes in personnel and errors caused by third-party service providers.

When-issued and delayed delivery securities. Each fund may purchase securities on a "when-issued" basis or may purchase or sell securities for delayed delivery to or by the fund later than the normal settlement date at a stated price and yield. A fund generally would not pay for such securities or start earning interest on them until they are received. However, when a fund undertakes a when-issued or delayed delivery obligation, it immediately assumes the risks of ownership, including the risks of price fluctuation. Failure of the issuer to deliver a security purchased by a fund on a when-issued or delayed delivery basis may result in the fund's incurring a loss or missing an opportunity to make an alternative investment.

A security purchased on a when-issued or delayed delivery basis is recorded as an asset on the commitment date and is subject to changes in market value, generally based upon changes in the level of interest rates. Thus, fluctuation in the value of the security from the time of the commitment date will affect a fund's net asset value.

When a fund commits to purchase securities on a when-issued or delayed delivery basis, it will designate cash or other liquid assets on the books of its custodian, marked to market daily, in an amount at least equal to its obligations under the commitment. A fund's when-issued and delayed delivery purchase commitments could cause its net asset value per share to be more volatile.

A fund may sell the right to acquire the security prior to delivery if UBS AM deems it advantageous to do so, which may result in a gain or loss to the fund.

In October 2020, the US Securities and Exchange Commission ("SEC") adopted a final rule ("Rule 18f-4") related to the use of derivatives, reverse repurchase agreements and certain other transactions by registered investment companies and rescinded and withdrew certain guidance of the SEC and its staff regarding asset segregation and coverage transactions. A money market fund cannot rely on Rule 18f-4 to use such instruments, with a limited exception for investments in certain when-issued, forward-settling and non-standard settlement cycle securities transactions. Under Rule 18f-4, a money market fund, such as the fund, is only permitted to invest in a security on a when-issued or forward-settling basis, or with a non-standard settlement cycle, and the transaction will be deemed not to involve a senior security (as defined under Section 18(g) of the Investment Company Act), provided that, (i) the fund intends to physically settle the transaction and (ii) the transaction will settle within 35 days of its trade date. These requirements may limit the ability of a fund to invest in securities on a when-issued or forward-settling basis, or with a non-standard settlement cycle, as part of its investment strategies.

Investments in other investment companies. Each fund may invest in securities of other investment companies subject to limitations imposed by the Investment Company Act. Among other things, these limitations generally restrict a fund's aggregate investments in other investment companies that are not themselves money market funds to no more than 10% of its total assets, subject to a number of exceptions under SEC rules, including Rule 12d1-4. The feeder funds intend to rely on Section 12(d)(1)(E) of the Investment Company Act, which allows a fund to invest substantially all of its assets in the securities of other investment companies (*i.e.*, the master fund) without regard to the 10% limitation.

Lending of portfolio securities. Each fund is authorized to lend its portfolio securities to broker-dealers or institutional investors that UBS AM deems qualified. Lending securities enables a fund to earn additional income, but could result in a loss or delay in recovering these securities. The borrower of a fund's portfolio securities must maintain acceptable collateral with the fund's custodian (or a sub-custodian or a special "tri-party" custodian) in an amount, marked to market daily, at least equal to the market value of the securities loaned, plus accrued interest and dividends. Acceptable collateral is limited to cash and US government securities. Each fund may reinvest any cash collateral in money market investments or other short-term liquid investments, including other investment companies. In determining whether to lend securities to a particular broker-dealer or institutional investor, UBS AM or a lending agent subject to UBS AM direction and oversight will consider, and during the period of the loan will monitor, all relevant facts and circumstances, including the creditworthiness of the borrower. Each fund will retain authority to terminate any of its loans at any time. Each fund may pay reasonable fees in connection with a loan and may pay the borrower or placing broker a negotiated portion of the interest earned on the reinvestment of cash held as collateral. Each fund will receive amounts equivalent to any interest, dividends or other distributions on the securities loaned. Each fund will seek to retain record ownership of loaned securities to exercise beneficial rights, such as voting and subscription rights, when retaining such rights is considered to be in the fund's interest and operationally reasonably practicable.

State Street Bank and Trust Company ("State Street") has been approved to serve as lending agent and receives fees for such services. Additionally, State Street has been approved to engage a third party bank as a special "tri-party" custodian for securities lending arrangements.

Master-feeder structure. Unlike other funds which directly acquire and manage their own portfolio securities, each fund seeks to achieve its objective by investing substantially all of its assets in a corresponding master fund, a separate registered open-end investment company with the same objective as the fund.

Therefore, a shareholder's interest in the master fund's securities is indirect. In addition to selling beneficial interests to the funds, a master fund may sell beneficial interests to other mutual funds and other investors. Such investors will invest in the master fund on similar terms and conditions and will pay a proportionate share of the master fund's expenses. However, the other investors investing in the master fund may have different operating expenses or characteristics. Therefore, shareholders should be aware that these differences might result in differences in returns experienced by investors in different mutual funds that invest in the corresponding master fund. Such differences in return are also present in other mutual fund structures. Information concerning other holders of interest in the master fund is available by contacting UBS AM at 1-888-547 FUND.

The master-feeder structure is relatively complex, so shareholders should carefully consider this investment approach.

Small funds investing in a corresponding master fund may be materially affected by the actions of larger investors invested in the master fund. Investors with a greater pro rata ownership in the master fund could have effective voting control of the operation of the master fund. Whenever the investors in the master fund are requested to vote on matters relating to a master fund, the master fund will, except as permitted by the SEC, submit matters to all of its feeder funds and other investors for a vote. A feeder fund asked to vote on matters pertaining to its corresponding master fund will either hold a shareholder meeting and vote in accordance with shareholder instructions, or otherwise act in accordance with applicable law.

Certain changes in a master fund's objectives, policies or restrictions may require a feeder fund to withdraw its interest in the master fund. Any such withdrawal could result in a distribution "in kind" of portfolio securities (as opposed to a cash distribution from the master fund). If securities are distributed, a fund could incur tax and other charges in converting the securities to cash. In addition, the distribution in kind may result in a less diversified portfolio of investments or adversely affect the liquidity of a fund. Notwithstanding the above, there are some other means for meeting redemption requests, such as borrowing.

A fund may withdraw its investment in a corresponding master fund at any time, if the board determines that it is in the best interests of the shareholders of the fund to do so. Upon any such withdrawal, the board would consider what action might be taken, including the investment of all the assets of the fund in another pooled investment entity having the same objective as the fund or the retention of an investment advisor to manage the fund's assets in accordance with the investment policies described elsewhere herein.

Cyber security risk. As the use of technology has become more prevalent in the course of business, a fund, like other business organizations, has become more susceptible to operational, information security and related risks through breaches in cybersecurity. In general, cybersecurity failures or breaches of a fund or its service providers or the issuers of securities in which a fund invests may result from deliberate attacks or unintentional events and may arise from external or internal sources. Cybersecurity breaches may involve unauthorized access to a fund's digital information systems (e.g., through "hacking" or malicious software coding), but may also result from outside attacks such as denial-of-service attacks (i.e., efforts to make network services unavailable to intended users). Cybersecurity failures or breaches affecting a fund's investment advisor or any other service providers (including, but not limited to, fund accountants, custodians, transfer agents and financial intermediaries) have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with a fund's ability to calculate its net asset value, impediments to trading, the inability of fund shareholders to transact business, destruction to equipment and systems, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs. In addition, substantial costs may be incurred in order to prevent any cybersecurity breaches in the future.

While UBS AM has established business continuity plans in the event of, and risk management systems to prevent, such cybersecurity breaches, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, UBS AM does not directly control the cybersecurity plans and

systems put in place by the funds' other service providers or any other third parties whose operations may affect a fund or its shareholders. A fund and its shareholders could be negatively impacted as a result.

Market risk. Market risks, including political, regulatory, market, economic and social developments, and developments that impact specific economic sectors, industries or segments of the market, can affect the value and liquidity of the funds' investments. In addition, turbulence in financial markets and reduced liquidity in equity and/or fixed-income markets may negatively affect the funds. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. Events such as war, acts of terrorism, natural disasters, recessions, rapid inflation, the imposition of international sanctions, pandemics or other public health threats could also significantly impact a fund and its investments. These risks may be magnified if certain events or developments adversely interrupt the global supply chain, and could affect companies worldwide.

Recent examples include pandemic risks related to the novel coronavirus ("COVID-19") and the aggressive measures taken worldwide in response by (i) governments, including closing borders, restricting travel and imposing prolonged quarantines of, or similar restrictions on, large populations, and (ii) businesses, including forced or voluntary closures, changes to operations and reductions of staff. The effects of COVID-19 have contributed to increased volatility in global financial markets and may affect certain countries, regions, companies, industries and market sectors more dramatically than others. The COVID-19 pandemic has had, and any other outbreak of an infectious disease or serious environmental or public health concern could have, a significant negative impact on economic and market conditions, could exacerbate pre-existing political, social and economic risks in certain countries or regions and could trigger a prolonged period of global economic slowdown, which may impact the funds. It is not known how long the impact of the COVID-19 pandemic will, or future impacts of other significant events would, last or the severity thereof. To the extent a fund is overweight in certain countries, regions, companies, industries or market sectors, such positions will increase the risk of loss from adverse developments affecting those countries, regions, companies, industries or sectors.

Money market fund regulatory risk. The US Securities and Exchange Commission ("SEC") adopted changes to the rules that govern SEC registered money market funds in July 2023. These changes include, among other things: (1) requiring institutional prime and institutional tax-exempt money market funds to charge mandatory liquidity fees when the fund's net redemptions exceed certain levels; (2) allowing a money market fund's board or its delegate to charge liquidity fees when it determines such fee would be in the best interests of the fund; (3) removing a fund's ability to impose a temporary suspension of redemptions (except under extraordinary circumstances as part of a liquidation); (4) substantially increasing the required minimum levels of liquid assets a fund must hold; (5) allowing government money market funds and retail money market funds to engage in certain practices in order to maintain a stable NAV in a negative interest rate environment; and (6) enhancing reporting requirements for all money market funds.

These changes have a phase in period with significant changes taking effect on April 2, 2024 and October 2, 2024. These changes may affect the investment strategies, performance, yield, operating expenses and continued viability of a fund. As of the date of this SAI, UBS AM is evaluating the potential impact of these regulatory changes and expects to update investors in the future as the regulatory compliance deadlines approach.

Low or negative interest rates. In a low or negative interest rate environment, debt instruments may trade at negative yields, which means the purchaser of the instrument may receive at maturity less than the total amount invested. In addition, in a negative interest rate environment, if a bank charges negative interest, instead of receiving interest on deposits, a depositor must pay the bank fees to keep money with the bank. To the extent a fund holds a negatively-yielding debt instrument or has a bank deposit with a negative interest rate, the funds would generate a negative return on that investment.

In the past, certain European countries and Japan have pursued negative interest rate policies, and there is the possibility that negative interest rate policies might be pursued in the United States at some point in the future. In a low or negative interest rate environment, some investors may seek to reallocate assets to other income-producing

assets, such as investment-grade and higher-yield debt instruments, or equity investments that pay a dividend, absent other market risks that may make such alternative investments unattractive. This increased demand for higher yielding assets may cause the price of such instruments to rise while triggering a corresponding decrease in yield over time, thus reducing the value of such alternative investments. In addition, a move to higher yielding investments may cause investors, including a fund (to the extent permitted by its investment objective and strategies), to seek fixed-income investments with longer maturities and/or potentially reduced credit quality in order to seek the desired level of yield. These considerations may limit the funds' ability to locate fixed-income instruments containing the desired risk/return profile.

For funds that seek to maintain a stable \$1.00 share price, a low or negative interest rate environment could impact such funds' ability to do so. If such a fund has a negative gross yield as a result of negative interest rates, it may reduce the number of shares outstanding on a pro rata basis through reverse stock splits, negative dividends or other mechanisms to seek to maintain a stable \$1.00 price per share, to the extent permissible by applicable law and its organizational documents. The use of such measures is also subject to certain determinations by the fund's board and disclosure requirements, and may have tax implications for the fund and its shareholders. Alternatively, such funds may discontinue using the amortized cost method of valuation to maintain a stable \$1.00 price per share and establish a fluctuating net asset value per share rounded to four decimal places by using available market quotations or equivalents. In addition, for funds that have a fluctuating net asset value per share rounded to four decimal places using market-based pricing, a low or negative interest rate environment could increase fluctuation or volatility of the net asset value per share for such funds.

Investment limitations of the funds

Fundamental investment limitations. The following investment limitations, which apply to the funds and their corresponding master fund, cannot be changed with respect to a fund or master fund without the affirmative vote of the lesser of (a) more than 50% of the outstanding shares of the fund or (b) 67% or more of the shares present at a shareholders' meeting if more than 50% of the outstanding shares are represented at the meeting in person or by proxy. If a percentage restriction is adhered to at the time of an investment or transaction, a later increase or decrease in percentage resulting from changing values of portfolio securities or amount of total assets will not be considered a violation of any of the following limitations. With regard to the borrowings limitation in fundamental limitation (2), the fund will comply with the applicable restrictions of Section 18 of the Investment Company Act.

Each fund will not:

- (1) Purchase securities of any one issuer if, as a result, more than 5% of the fund's total assets would be invested in securities of that issuer or the fund would own or hold more than 10% of the outstanding voting securities of that issuer, except that up to 25% of the fund's total assets may be invested without regard to this limitation, and except that this limitation does not apply to securities issued or guaranteed by the US government, its agencies and instrumentalities or to securities issued by other investment companies.

The following interpretations apply to, but are not a part of, this fundamental restriction: (a) mortgage-and asset-backed securities will not be considered to have been issued by the same issuer by reason of the securities having the same sponsor, and mortgage-and asset-backed securities issued by a finance or other special purpose subsidiary that are not guaranteed by the parent company will be considered to be issued by a separate issuer from the parent company, and (b) consistent with SEC and SEC staff guidance, the funds may invest up to 10% of their total assets in securities that are subject to demand features or guarantees issued by a single institution.

- (2) Issue senior securities or borrow money, except as permitted under the Investment Company Act and then not in excess of 33 $\frac{1}{3}$ % of the fund's total assets (including the amount of the senior securities issued but reduced by any liabilities not constituting senior securities) at the time of the issuance or borrowing, except that the fund may borrow up to an additional 5% of its total assets (not including the amount borrowed) for temporary or emergency purposes.
- (3) Make loans, except through loans of portfolio securities or through repurchase agreements, provided that for purposes of this restriction, the acquisition of bonds, debentures, other debt securities or instruments, or participations or other interests therein and investments in government obligations, commercial paper, certificates of deposit, bankers' acceptances or similar instruments will not be considered the making of a loan.

The following interpretation applies to, but is not a part of, this fundamental restriction: Investments in master notes, funding agreements and similar instruments will not be considered to be the making of a loan.

- (4) Engage in the business of underwriting securities of other issuers, except to the extent that the fund might be considered an underwriter under the federal securities laws in connection with its disposition of portfolio securities.
- (5) Purchase or sell real estate, except that investments in securities of issuers that invest in real estate and investments in mortgage-backed securities, mortgage participations or other instruments supported by interests in real estate are not subject to this limitation, and except that the fund may exercise rights under agreements relating to such securities, including the right to enforce security interests and to hold real estate acquired by reason of such enforcement until that real estate can be liquidated in an orderly manner.

- (6) Purchase or sell physical commodities unless acquired as a result of owning securities or other instruments, but the fund may purchase, sell or enter into financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments.
- (7) Purchase any security if, as a result of that purchase, 25% or more of the fund's total assets would be invested in securities of issuers having their principal business activities in the same industry, except that this limitation does not apply to securities issued or guaranteed by the US government, its agencies or instrumentalities or to municipal securities or to certificates of deposit and bankers' acceptances of domestic branches of US banks.

The following interpretations apply to, but are not a part of, this fundamental restriction: (a) US banking (including US finance subsidiaries of non-US banks) and non-US banking will be considered to be different industries; (b) asset-backed securities will be grouped in industries based upon their underlying assets and not treated as constituting a single, separate industry; (c) tax-exempt securities backed only by the assets and revenues of a non-government user will be considered to be subject to this industry concentration limitation; and (d) taxable municipal securities will not be considered municipal securities for purposes of this industry concentration limitation.

Non-fundamental investment limitations. The following investment restrictions, which apply to the funds and their corresponding master fund, are non-fundamental and may be changed by the vote of the board without shareholder approval. If a percentage restriction is adhered to at the time of an investment or transaction, a later increase or decrease in percentage resulting from changing values of portfolio securities or amount of total assets will not be considered a violation of any of the following limitations.

Each fund will not:

- (1) purchase securities on margin, except for short-term credit necessary for clearance of portfolio transactions.
- (2) purchase portfolio securities while borrowings in excess of 5% of its total assets are outstanding.

Disclosure of portfolio holdings

The funds will hold beneficial interests in the master fund for so long as they continue to participate in the master-feeder arrangement. During that time, the portfolio holdings disclosure policies and procedures of the funds will apply to the master fund, which holds portfolio securities directly.

Policies and procedures generally. UBS AM and each fund's board have adopted portfolio holdings disclosure policies and procedures to govern the disclosure of the portfolio holdings of a fund. UBS AM and each fund's chief compliance officer also considered actual and potential material conflicts that could arise in such circumstances between the interests of fund shareholders, on the one hand, and those of a fund's investment advisor, distributor, or any affiliated person of a fund, its investment advisor, or its distributor, on the other. Each fund's disclosure policy with respect to the release of portfolio holdings information is to release only such information consistent with applicable legal requirements and the fiduciary duties owed to shareholders. Subject to the limited exceptions described below, each fund's portfolio holdings will not be made available to anyone outside of UBS AM unless and until the information has been made available to all shareholders or the general public in a manner consistent with the spirit and terms of this policy. A description of the type and frequency of portfolio holdings that are disclosed to the public also is contained in the funds' prospectuses.

After giving due consideration to such matters and after the exercise of their fiduciary duties and reasonable business judgment, UBS AM and each fund's board determined that each fund has a legitimate business purpose for disclosing portfolio holdings to certain persons/entities and that the policies and procedures are reasonably designed to ensure that disclosure of portfolio holdings and information about portfolio holdings is in the best interests of fund shareholders and appropriately address the potential for material conflicts of interest.

UBS AM's procedures require that the UBS AM Legal and/or Compliance Departments address any material conflicts of interest regarding a disclosure of portfolio holdings and determine whether a disclosure of a fund's portfolio holdings is for a legitimate business purpose and in the best interests of the fund's shareholders prior to the Treasurer, Assistant Treasurer, Secretary or Assistant Secretary of each fund or the UBS AM Legal and/or Compliance Departments authorizing the disclosure of portfolio holdings. The UBS AM Legal and/or Compliance Departments will periodically review how each fund's portfolio holdings are being disclosed to and used by, if at all, service providers, UBS AM affiliates and certain fiduciaries, and broker-dealers to ensure that such disclosure and use is for legitimate fund business reasons and consistent with the best interests of the fund's shareholders.

Board oversight. Each fund's board exercises continuing oversight of the disclosure of fund portfolio holdings by (i) overseeing the implementation and enforcement by the fund's chief compliance officer of the portfolio holdings disclosure policies and procedures, and the fund's policies and procedures regarding the misuse of inside information; (ii) considering reports and recommendations by the chief compliance officer concerning any material compliance matters (as defined in Rule 38a-1 under the Investment Company Act and Rule 206(4)-7 under the Investment Advisers Act of 1940 ("Advisers Act")) that may arise in connection with any policies governing portfolio holdings, and (iii) considering whether to approve or ratify any amendment to any policies governing portfolio holdings. UBS AM and each fund's board reserve the right to amend a fund's policies and procedures regarding the disclosure of portfolio holdings at any time and from time to time subject to the approval of each fund's board.

Complete portfolio holdings—disclosure to service providers subject to confidentiality and trading restrictions. UBS AM, for legitimate business purposes, may disclose a fund's complete portfolio holdings at times it deems necessary and appropriate to rating and ranking organizations, financial printers, proxy voting service providers, pricing information vendors, third-parties that deliver analytical, statistical or consulting services, custodians or a redeeming party's custodian or transfer agent as necessary in connection with redemptions in kind, and other third parties that provide services (collectively, "Service Providers") to UBS AM and/or a fund.

Disclosure of complete portfolio holdings to a Service Provider is conditioned on the Service Provider being subject to a duty of confidentiality, including a duty not to trade on the basis of any material nonpublic information pursuant to the terms of the service agreement between the Service Provider and a fund or UBS AM, or the terms of the confidentiality agreement. The frequency with which complete portfolio holdings may be disclosed to a Service Provider, and the length of lag, if any, between the date of information and the date on which the information is disclosed to the Service Provider, is determined based on the facts and circumstances, including, without limitation, the nature of the portfolio holdings information to be disclosed, the risk of harm to a fund and its shareholders, and the legitimate business purposes served by such disclosure. Disclosure of complete portfolio holdings to a Service Provider must be authorized by a Trust officer or the General Counsel, Deputy General Counsel or an Associate General Counsel within the Legal and Compliance Departments of UBS AM.

Complete portfolio holdings—disclosure to UBS AM affiliates and certain fiduciaries subject to confidentiality and trading restrictions. A fund’s complete portfolio holdings may be disclosed between and among the following persons (collectively, “Affiliates and Fiduciaries”), subject to authorization by the Treasurer, Assistant Treasurer, Secretary or Assistant Secretary of a fund or by an attorney in the Legal and Compliance Departments of UBS AM, for legitimate business purposes within the scope of their official duties and responsibilities, subject to such persons’ continuing duty of confidentiality and duty not to trade on the basis of any material nonpublic information, as such duties are imposed under UBS AM’s code of ethics, a fund’s policies and procedures regarding the prevention of the misuse of inside information, by agreement or under applicable laws, rules and regulations: (i) persons who are subject to the code of ethics or the policies and procedures regarding the prevention of the misuse of inside information; (ii) an investment advisor, distributor, administrator, transfer agent, custodian or securities lending agent to a fund; (iii) an accounting firm, an auditing firm or outside legal counsel retained by UBS AM or a fund; (iv) an investment advisor to whom complete portfolio holdings are disclosed for due diligence purposes when the advisor is in merger or acquisition talks with a fund’s current advisor; (v) a newly hired investment advisor or sub-advisor to whom complete portfolio holdings are disclosed prior to the time it commences its duties; and (vi) custodians and other third parties as necessary in connection with redemptions in kind of a fund’s shares.

The frequency with which complete portfolio holdings may be disclosed between and among Affiliates and Fiduciaries, and the length of the lag, if any, between the date of the information and the date on which the information is disclosed between and among the Affiliates and Fiduciaries, is determined by the UBS AM Legal and Compliance Departments based on the facts and circumstances, including, without limitation, the nature of the portfolio holdings information to be disclosed and the risk of harm to a fund and its shareholders and the legitimate business purposes served by such disclosure.

Complete and partial portfolio holdings—arrangements to disclose to service providers and fiduciaries. As of the date of this SAI, the specific Service Providers, Affiliates and Fiduciaries with whom the funds have arrangements to provide portfolio holdings in advance of their release to the general public in the course of performing or to enable them to perform services for the funds are:

- State Street, each fund’s custodian, accounting agent, securities lending agent, regulatory support service provider and sub-administrator, receives portfolio holdings information daily on a real-time basis in connection with the services it provides.
- Ernst & Young LLP, each fund’s independent registered public accounting firm, receives portfolio holdings information on an annual and semi-annual basis for financial reporting purposes. There is a 25-day lag between the date of portfolio holdings information and the date on which the information is disclosed to Ernst & Young LLP for semi-annual reporting purposes. Ernst & Young LLP also receives portfolio holdings information annually at year-end for audit purposes. In this case, there is no lag between the date of the portfolio holdings information and the date on which the information is disclosed to Ernst & Young LLP. In addition, Ernst & Young LLP receives holdings twice a year for fiscal income and excise tax provision reporting purposes with a 25-day lag time.

- A limited number of financial printers used by each fund to print and file its annual and semi-annual shareholder reports and other regulatory materials. There is at least a two week lag between the date of the portfolio holdings information and the date on which the information is disclosed to the parties.
- The rating agency of Fitch Ratings Inc. may receive portfolio holdings information approximately 5 days after the end of each month so that the funds may be included in the rating agency's industry reports and other materials. There is an approximately 5-day or longer lag between the date of the portfolio holdings information and the date on which the information is disclosed to the rating agency.
- The rating agency of Moody's Investors Service, Inc. receives portfolio holdings information approximately 5 days after the end of each month so that the funds may be included in the rating agency's industry reports and other materials. There is an approximately 5-day lag between the date of the portfolio holdings information and the date on which the information is disclosed to the rating agency.
- Interactive Data Corporation receives portfolio holdings information daily on a real-time basis in connection with providing pricing information for the funds' portfolio securities.
- Thomson Reuters receives portfolio holdings information weekly on a real-time basis in connection with providing pricing information for the funds' portfolio securities.
- Investment Company Institute, the national association of US investment companies, including mutual funds, closed-end funds, exchange-traded funds and unit investment trusts, receives portfolio holdings information on a monthly basis in order to compile and analyze industry data. There may be a delay of up to approximately 5 business days between the date of the portfolio holdings information and the date on which the information is disclosed to the Investment Company Institute.
- Marketing Spectrum receives portfolio holdings information no earlier than three weeks after the close of a fiscal annual or semi-annual period in connection with its preparation of a draft portion of annual and semi-annual shareholder reports.

Complete and partial portfolio holdings—disclosure to broker-dealers in the normal course of managing fund assets. An investment advisor, administrator or custodian for a fund may, for legitimate business purposes within the scope of their official duties and responsibilities, disclose portfolio holdings (whether partial portfolio holdings or complete portfolio holdings) and other investment positions comprising a fund to one or more broker-dealers during the course of, or in connection with, normal day-to-day securities transactions with or through such broker-dealers subject to the broker-dealer's legal obligation not to use or disclose material nonpublic information concerning a fund's portfolio holdings, other investment positions or securities transactions without the consent of a fund or the Treasurer, Assistant Treasurer, Secretary or Assistant Secretary of the fund, or an attorney in the UBS AM Legal and Compliance Departments. A fund has not given its consent to any such use or disclosure and no person or agent of UBS AM is authorized to give such consent except as approved by a fund's board. In the event consent is given to disclose portfolio holdings to a broker-dealer, the frequency with which the portfolio holdings may be disclosed to a broker-dealer, and the length of the lag, if any, between the date of the information and the date on which the information is disclosed to the broker-dealer, is to be determined based on the facts and circumstances, including, without limitation, the nature of the portfolio holdings information to be disclosed, and the risk of harm to the fund, its shareholders, and the legitimate fund purposes served by such disclosure.

Complete and partial portfolio holdings—disclosure as required by applicable law. Fund portfolio holdings and other investment positions comprising a fund may be disclosed to any person as required by applicable laws, rules and regulations. Examples of such required disclosure include, but are not limited to, disclosure of fund portfolio holdings (i) in a filing or submission with the SEC or another domestic or foreign regulatory body, (ii) in

connection with seeking recovery on defaulted bonds in a federal bankruptcy case, (iii) in connection with a lawsuit or (iv) as required by court order, subpoena or similar process (e.g., arbitration proceedings). The UBS AM Legal Department must authorize the disclosure of portfolio holdings information when required for a legal or regulatory purpose. The UBS AM Legal Department may not be able to prevent or place restrictions on the disclosure of a fund's portfolio holdings when compelled by law or regulation to provide such information, even if the UBS AM Legal Department determines that such disclosure may not be in the best interest of fund shareholders or that a material conflict of interest is present or appears to be present. However, the UBS AM Legal Department will attempt to monitor the use of any fund portfolio holdings information disclosed as required by law or regulation.

Disclosure of non-material information. Policies and procedures regarding non-material information permit UBS AM fund officers, UBS AM fund portfolio managers, and senior officers of UBS AM Fund Treasury, UBS AM Legal and Compliance Departments, and anyone employed by or associated with UBS AM who has been authorized by the UBS AM Legal and Compliance Departments' representatives (collectively, "Approved Representatives") to disclose any views, opinions, judgments, advice or commentary, or any analytical, statistical, performance or other information, in connection with or relating to a fund or its portfolio holdings and/or other investment positions (collectively, "commentary and analysis") or any changes in the portfolio holdings of a fund that occurred after the most recent calendar-quarter end (or, in the case of a money market fund, after the most recent monthly public posting of portfolio holdings) ("recent portfolio changes") to any person if such information does not constitute material nonpublic information and complies with the portfolio holdings disclosure policies and procedures described above.

An Approved Representative must make a good faith determination whether the information constitutes material nonpublic information, which involves an assessment of the particular facts and circumstances.

UBS AM believes that in most cases recent portfolio changes that involve a few or even several securities in a diversified portfolio or commentary and analysis would be immaterial and would not convey any advantage to a recipient in making an investment decision concerning a fund. Nonexclusive examples of commentary and analysis about a fund include (i) the allocation of the fund's portfolio holdings and other investment positions among various asset classes, sectors, industries and countries, (ii) the characteristics of the fund's portfolio holdings and other investment positions, (iii) the attribution of fund returns by asset class, sector, industry and country, and (iv) the volatility characteristics of the fund. An Approved Representative may in its sole discretion determine whether to deny any request for information made by any person, and may do so for any reason or no reason.

"Approved Representatives" include persons employed by or associated with UBS AM who have been authorized by the Legal and Compliance Departments of UBS AM to disclose recent portfolio changes and/or commentary and analysis in accordance with the applicable policies and procedures.

Prohibitions on disclosure of portfolio holdings. No person is authorized to disclose fund portfolio holdings or other investment positions (whether online at <http://www.ubs.com>, in writing, by fax, by e-mail, orally or by other means) except in accordance with the applicable policies and procedures. In addition, no person is authorized to make disclosure pursuant to these policies and procedures if such disclosure is otherwise unlawful under the antifraud provisions of the federal securities laws (as defined in Rule 38a-1 under the Investment Company Act). Furthermore, UBS AM, in its sole discretion, may determine not to disclose portfolio holdings or other investment positions comprising a fund to any person who could otherwise be eligible to receive such information under the applicable policies and procedures, or may determine to make such disclosures publicly as provided by the policies and procedures.

Prohibitions on receipt of compensation or other consideration. The portfolio holdings disclosure policies and procedures prohibit a fund, its investment advisor and any other person to pay or receive any compensation or other consideration of any type for the purpose of obtaining disclosure of fund portfolio holdings or other investment positions. "Consideration" includes any agreement to maintain assets in a fund or in other investment companies or accounts managed by the investment advisor or by any affiliated person of the investment advisor.

Organization of the Trust; trustees and officers; principal holders and management ownership of securities

The Trust was organized on April 29, 1998 as a statutory trust under the laws of Delaware and currently has seventeen series. The Trust has authority to establish additional series and issue an unlimited number of shares of beneficial interest of each existing or future series, par value of \$0.001 per share.

The Trust is governed by a board of trustees, which oversees the funds' operations and which is authorized to establish additional series. Each trustee serves an indefinite term of office. The tables below show, for each trustee (sometimes referred to as "board member") and officer, his or her name, address and age, the position held with the Trust, the length of time served as trustee or officer of the Trust, the trustee's or officer's principal occupations during the last five years, the number of portfolios in the UBS fund complex overseen by the trustee or for which a person served as an officer, and other directorships held by such trustee.

Independent trustees

Name, address, and age	Position(s) held with Trust	Term of office ¹ and length of time served	Principal occupation(s) during past 5 years	Number of portfolios in fund complex overseen by trustee	Other directorships held by trustee
Heather R. Higgins; 64 c/o Keith A. Weller, Fund Secretary UBS Asset Management (Americas) LLC One North Wacker Drive, Chicago, IL 60606	Trustee and Chair of the Board of Trustees	Since 2005 (Trustee); since September 2023 (Chair of the Board of Trustees)	Mrs. Higgins is the president and director of The Randolph Foundation (charitable foundation) (since 1991). Mrs. Higgins also serves (or has served) on the boards of several non-profit charitable groups, including the Independent Women's Forum (chairman) and the Philanthropy Roundtable (vice chairman). She also serves on the board of the Hoover Institution (from 2001 to 2007 and since 2009).	Mrs. Higgins is a director or trustee of 7 investment companies (consisting of 42 portfolios) for which UBS AM or an affiliate serves as investment advisor or manager.	None
Richard R. Burt, 77 McLarty Associates 900 17th Street, N.W. 8th Floor Washington, D.C. 20006	Trustee	Since 1998	Mr. Burt is a managing partner of McLarty Associates (a consulting firm) (since 2007). He was chairman of IEP Advisors (international investments and consulting firm) until 2009.	Mr. Burt is a trustee of 4 investment companies (consisting of 39 portfolios) for which UBS AM serves as investment advisor or manager.	None
Bernard H. Garil; 83 6754 Casa Grande Way Delray Beach, FL 33446	Trustee	Since 2005	Mr. Garil is retired (since 2001). He was a managing director at PIMCO Advisory Services (from 1999 to 2001) where he served as president of closed-end funds and vice-president of the variable insurance product funds advised by OpCap Advisors (until 2001).	Mr. Garil is a trustee of 4 investment companies (consisting of 39 portfolios) for which UBS AM serves as investment advisor or manager.	Mr. Garil is also a trustee for the Brooklyn College Foundation, Inc. (charitable foundation).

Independent trustees

Name, address, and age	Position(s) held with Trust	Term of office ¹ and length of time served	Principal occupation(s) during past 5 years	Number of portfolios in fund complex overseen by trustee	Other directorships held by trustee
Virginia G. Breen; 59 c/o Keith A. Weller Fund Secretary UBS Asset Management (Americas) LLC One North Wacker Drive Chicago, IL 60606	Trustee	Since July 2023	Ms. Breen is a private investor and board member of certain entities (as listed herein).	Ms. Breen is a director or trustee of 7 investment companies (consisting of 42 portfolios) for which UBS AM or an affiliate serves as investment advisor or manager.	Director of: Paylocity Holding Corp.; UBS A&Q Fund Complex (3 funds); the Neuberger Berman Private Equity Registered Funds (21 funds); certain funds in the Calamos Fund Complex (33 funds). Former Director of JLL Income Property Trust, Inc. (from 2004 to June 2023) and Tech and Energy Transition Corporation (2021 to March 2023).
David R. Malpass; 68 c/o Keith A. Weller Fund Secretary UBS Asset Management (Americas) LLC One North Wacker Drive Chicago, IL 60606	Trustee	Since July 2023	Mr. Malpass served as President of the World Bank Group from April 2019 to June 2023. Prior to that, he served as US Treasury Undersecretary for International Affairs (August 2017—April 2019) (Mr. Malpass also had previously served as a trustee of the funds from 2014 until 2017, when he entered public service.)	Mr. Malpass is a trustee of 4 investment companies (consisting of 39 portfolios) for which UBS AM serves as investment advisor or manager.	In his role as President of the World Bank Group, Mr. Malpass was President of, and Chairman of the Boards and Administrative Councils of, the following: International Bank for Reconstruction and Development; International Development Association; International Finance Corporation; Multilateral Investment Guarantee Agency; and International Centre for Settlement of Investment Disputes. In his role as Undersecretary of the US Treasury, Mr. Malpass was also on the boards of Overseas Private Investment Corporation (the US Government's development finance institution until it merged with another government entity in 2019) and Millennium Challenge Corporation (a US foreign aid agency).

¹ Each trustee holds office for an indefinite term.

Officers

Name, address, and age	Position(s) held with Trust	Term of office ¹ and length of time served	Principal occupation(s) during past 5 years
Rose Ann Bubloski ⁴ ; 56	Vice President and Assistant Treasurer	Since 2011	Ms. Bubloski is a director (since 2012) and senior manager of fund accounting—US (previously named product control and investment support) at UBS AM and/or UBS AM (US) (“UBS AM—Americas region”). Ms. Bubloski is vice president and assistant treasurer of 6 investment companies (consisting of 50 portfolios) for which UBS AM serves as investment advisor or manager. Ms. Bubloski is chief financial officer and treasurer of 5 investment companies (consisting of 9 portfolios) for which Credit Suisse Asset Management, LLC serves as investment advisor or manager.
Mark E. Carver ² ; 60	President	Since October 2023	Mr. Carver is an executive director and senior member of UBS AM’s Americas Products team (since rejoining UBS AM in 2022). In addition to his fund board relations and governance role, he serves as a regional strategic product shelf manager, including UBS AM’s strategic product alignment with UBS Financial Services Inc. Mr. Carver previously served in the role of president of the funds from 2010 to 2018 before moving to a senior product role at UBS Financial Services Inc. until 2020. Before rejoining UBS AM, Mr. Carver served in a consulting capacity for FLX Networks, a firm serving both the asset management and wealth management industries. He is president of 6 investment companies (consisting of 50 portfolios) for which UBS AM serves as investment advisor or manager.
Franklin P. Dickson ⁴ ; 45	Vice President	Since 2017	Mr. Dickson is an associate director (since 2015) and tax compliance manager (since 2017) (prior to which he was a product controller (from 2015 to 2017)) of fund accounting—US (previously named product control and investment support) of UBS AM—Americas region. Mr. Dickson is a vice president of 6 investment companies (consisting of 50 portfolios) for which UBS AM serves as investment advisor or manager.
Lisa N. DiPaolo ² ; 46	Vice President	Since 2015	Ms. DiPaolo is an executive director (since 2020) (prior to which she was a director from 2008 until 2020) and portfolio manager (since 2015) at UBS AM—Americas region. Ms. DiPaolo joined UBS AM—Americas region in 2000 and has been a municipal securities analyst on the tax-free fixed income team. Ms. DiPaolo is a vice president of three investment companies (consisting of 24 portfolios) for which UBS AM serves as investment advisor or manager.
Charles W. Grande ² ; 60	Vice President	Since 2017	Mr. Grande is a managing director, head of the municipal fixed income team (since 2020); formerly he was co-head from 2017 until 2020) and head of municipal credit research (since 2009) with UBS AM—Americas region. Mr. Grande is a vice president of two investment companies (consisting of 23 portfolios) for which UBS AM serves as investment advisor or manager.
Joanne M. Kilkeary ⁴ ; 56	Vice President, Treasurer and Principal Accounting Officer	Since 1999 (Vice President) and since 2017 (Treasurer and Principal Accounting Officer)	Ms. Kilkeary is an executive director (since 2013) (prior to which she was a director (from 2008 to 2013)) and head of fund accounting—US (since 2020) (prior to which she was head of regulatory, tax, audit and board governance for product control and investment support (from 2017 until 2020)) (prior to which she was a senior manager of registered fund product control of UBS AM—Americas region (from 2004-2017)). Ms. Kilkeary is a vice president, treasurer and principal accounting officer of 6 investment companies (consisting of 50 portfolios) for which UBS AM serves as investment advisor or manager.
Leesa Merrill ³ ; 45	Chief Compliance Officer	Since 2022	Ms. Merrill is an executive director (since 2023) (prior to which she was a director (from 2014 until 2023) and served as head of compliance risk (from 2020 to 2022) (prior to which she was a senior compliance officer (from 2004 until 2020) for UBS AM—Americas region. Ms. Merrill serves as chief compliance officer of 6 investment companies (consisting of 50 portfolios) for which UBS AM or one of its affiliates serves as investment advisor or manager.

Officers

Leadership structure and qualifications of board of trustees

The board is responsible for oversight of the funds. The board is currently composed of five trustees, all of whom are not "interested persons" of the funds as that term is defined by the Investment Company Act ("Independent Trustees"). The board members have selected Mrs. Higgins, an Independent Trustee, to act as chair of the board. The chair of the board's role is to preside at all meetings of the board and generally to act as a liaison with service providers, officers, attorneys and other trustees between meetings. The chair may also perform such other functions as may be delegated by the board from time to time. The board has established an Audit Committee and Nominating and Corporate Governance Committee to assist the board in the oversight and direction of the business and affairs of the funds, and from time to time may establish ad hoc committees, informal working groups or designate one or more members to review and address the policies and practices of the funds or to liaise with the funds' Chief Compliance Officer or service providers, including staff of UBS AM, with respect to certain specified matters. The board meets at regularly scheduled meetings five times throughout the year. In addition, the trustees may meet in person or by telephone at special meetings or on an informal basis at other times. Each committee meets as appropriate to conduct the oversight functions delegated to the committee by the board and reports its findings to the board. The board and Audit Committee conduct annual assessments of their oversight function and structure. The Independent Trustees have also engaged independent legal counsel to assist them in performing their oversight responsibilities. The trustees have determined that the board's leadership and committee structure is appropriate because it allows the board to exercise informed and independent judgment over the matters under its purview and allocate areas of responsibility among committees of Independent Trustees and the full board in a manner that enhances the full board's oversight.

The funds have engaged UBS AM to manage each fund on a day-to-day basis. The board is responsible for overseeing UBS AM and other service providers in the operations of the funds in accordance with the Investment Company Act, applicable state and other laws, and the funds' charter. The board reviews, on an ongoing basis, the funds' performance, operations and investment strategies and techniques. The board also conducts reviews of UBS AM and its role in running the operations of the funds.

The board has concluded that, based on each trustee's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other trustees, each trustee should serve as a trustee. In determining that a particular trustee is qualified to serve as a trustee, the board has considered a variety of criteria, none of which, in isolation, was controlling. The board believes that, collectively, the trustees have balanced and diverse experience,

skills, attributes and qualifications, which allow the board to operate effectively in governing the funds and protecting the interests of shareholders. Among the attributes common to all trustees are their ability to review critically, evaluate, question and discuss information provided to them, to interact effectively with other board members, UBS AM, other service providers, counsel and the independent registered public accounting firm, and to exercise effective business judgment in the performance of their duties as trustees. In addition, the board has taken into account the actual service and commitment of the trustees during their tenure in concluding that each should continue to serve. A trustee's ability to perform his or her duties effectively may have been attained through a trustee's educational background or professional training; business, consulting, public service or academic positions; experience from service as a trustee of the funds, other funds in the fund complex, other investment funds, public companies, or nonprofit entities or other organizations; and/or other life experiences. Set forth below is a brief discussion of the specific experience, qualifications, attributes or skills of each trustee that led the board to conclude that he or she should serve as a trustee.

Amb. Burt has served as a board member of the Trust and as a director/trustee of the other funds in the fund complex for over two decades, including as a member and/or chair of various board committees. Amb. Burt has many years experience in advising companies regarding international investment and risk management. Amb. Burt has served on the boards of directors of The Central Europe, Russia and Turkey Fund, Inc., The European Equity Fund, Inc. and The New Germany Fund, Inc. (and served as a member of each such fund's audit, nominating and governance committees) and has served as a director on other corporate boards. Prior to joining McLarty Associates in 2007, Amb. Burt was chairman of Diligence Inc. (information and risk management firm). Amb. Burt was the chief negotiator in the Strategic Arms Reduction Talks with the former Soviet Union (1989-1991) and the US Ambassador to the Federal Republic of Germany (1985-1989). He had also been a partner of McKinsey & Company (management consulting firm).

Mr. Garil and Mrs. Higgins were elected as directors/trustees of the funds in the fund complex during 2005-2006. Mr. Garil and Mrs. Higgins also serve as members and/or chairs of various board committees.

Mr. Garil has over four decades of experience in the fund management business and for much of that time he served as an executive of a fund adviser and as a member of the boards of funds, trust companies, and non-profit organizations, including OFI Trust Company and the Leukemia & Lymphoma Society. He began his career at the US Securities and Exchange Commission.

Mrs. Higgins has experience as a portfolio manager for a major US trust bank and has held senior executive positions and/or directorships at several major charitable organizations.

Ms. Breen became a trustee effective July 2023. She has more than 25 years of experience in the financial services industry. She also has experience serving on boards of other entities, including other investment companies.

Mr. Malpass became a trustee effective July 2023. In his role as President and Chairman of the Board of Executive Directors of the World Bank Group, Mr. Malpass led the Bank Group's public and private sector operations to a record \$122.6 billion in commitments in fiscal year 2023, including record investments in climate finance, pandemic preparedness, and debt sustainability. In addition to having been the President of the World Bank Group, he served as US Treasury Undersecretary for International Affairs and has held various other government positions. He was also Chief Economist at Bear, Stearns & Co. Mr. Malpass also had previously served as a trustee of the funds from 2014 until 2017, when he entered public service.

Additional details about each trustee's professional experience is included above in the table in the section captioned "Organization of the Trust; trustees and officers; principal holders and management ownership of securities." That table contains information regarding other directorships currently held by board members.

Risk oversight

The funds are subject to a number of risks, including investment, liquidity, compliance, operational and valuation risks, among others. Risk oversight forms part of the board's general oversight of each fund's investment program and operations and is addressed as part of various regular board and committee activities. Day-to-day risk management with respect to each fund is the responsibility of UBS AM or other service providers (depending on the nature of the risk), subject to supervision by UBS AM. Each of UBS AM and other service providers have their own independent interest in risk management and their policies and methods of risk management may differ from the funds and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result, the board recognizes that it is not possible to identify all of the risks that may affect the funds or to develop processes and controls to eliminate or mitigate their occurrence or effects, and that some are simply beyond any control of the funds or UBS AM, its affiliates or other service providers. As part of its regular oversight of the funds, the board, directly or through a committee, reviews reports from, among others, management, the funds' Chief Compliance Officer, its independent registered public accounting firm, counsel, and internal auditors for UBS AM or its affiliates, as appropriate, regarding risks faced by the funds and UBS AM's risk oversight programs. The board has appointed a Chief Compliance Officer who oversees the implementation and testing of each fund's compliance program and reports to the board regarding compliance matters for the funds and their service providers; the board has designated one of its members to liaise with the Chief Compliance Officer between board meetings to assure that significant compliance issues identified by the Chief Compliance Officer will be brought to the attention of the full board in a timely and appropriate manner. The board may, at any time and in its discretion, change the manner in which it conducts risk oversight.

Committees

The Trust has an Audit Committee and a Nominating and Corporate Governance Committee. The members of the Audit Committee are currently the Independent Trustees. Virginia G. Breen is chairperson of the Audit Committee. The following Independent Trustees are members of the Nominating and Corporate Governance Committee: Richard R. Burt (chairman), Heather R. Higgins and Bernard H. Garil.

The Audit Committee is responsible for, among other things: (i) overseeing the scope of a fund's audit; (ii) overseeing a fund's accounting and financial reporting policies, practices and internal controls; and (iii) approving, and recommending to the board for ratification, the selection, appointment, retention or termination of a fund's independent registered public accounting firm, as well as determining the compensation thereof. In furtherance of its duties, the Audit Committee also is responsible for, among other things: obtaining assurance from a fund's independent registered public accounting firm of its independence and discussing any disclosed relationships or services that may diminish the objectivity and independence of the independent registered public accounting firm; inquiring as to a fund's qualification under Subchapter M of the Internal Revenue Code and the amounts distributed and reported to shareholders; reviewing with the independent registered public accounting firm any problems or difficulties with the audit; and reporting to the full board and making recommendations as it deems necessary or appropriate. Although the Audit Committee has the responsibilities described above, it is not responsible for planning or conducting a fund's audit or determining whether a fund's financial statements are complete and accurate and are in accordance with US generally accepted accounting principles. Absent actual knowledge to the contrary, Audit Committee members are entitled to rely on the accuracy of the information they receive from persons within and outside a fund.

The Audit Committee normally meets in conjunction with regular board meetings, or more frequently as called by its chairperson. During the funds' fiscal year ended April 30, 2023, the Audit Committee held five meetings.

The Trust's board has also established a Nominating and Corporate Governance Committee that acts pursuant to a written charter. The Nominating and Corporate Governance Committee is responsible for, among other things: selecting, evaluating and recommending to the board candidates to be nominated as additional Independent Trustees; making recommendations to the board with respect to compensation of board and committee members; performing an annual evaluation of the board and its committees; reporting on such evaluation to the board; and

performing such other corporate governance functions as the board may authorize. The Nominating and Corporate Governance Committee held four meetings during the fiscal year ended April 30, 2023. The Nominating and Corporate Governance Committee will consider nominees recommended by shareholders if a vacancy among the Independent Trustees occurs. In order to recommend a nominee, a shareholder should send a letter to the chairperson of the Nominating and Corporate Governance Committee, Mr. Burt, care of the Secretary of the Trust at UBS Asset Management (Americas) LLC, One North Wacker Drive, Chicago, IL 60606, and indicate on the envelope "Nominating and Corporate Governance Committee." The shareholder's letter should state the nominee's name and should include the nominee's *résumé* or *curriculum vitae*, and must be accompanied by a written consent of the individual to stand for election if nominated for the board and to serve if elected by shareholders.

Information about Independent Trustee ownership of securities issued by UBS AM or any company controlling, controlled by or under common control with UBS AM

As of December 31, 2023, the Independent Trustees and their immediate family members did not own any securities issued by UBS AM or any company controlling, controlled by or under common control with UBS AM.

Compensation

Each Independent Trustee receives, in the aggregate from the UBS AM funds he or she oversees, an annual retainer of \$280,000. The chairperson of the board receives annually an additional \$85,000; the chairperson of the Audit Committee receives annually an additional \$35,000; and the chairperson of the Nominating and Corporate Governance Committee receives annually an additional \$25,000. In addition, a board member who undertakes a special assignment to provide assistance in coordinating the board's oversight of compliance matters, contract reconsideration matters or corporate restructuring matters (currently Heather R. Higgins, Bernard H. Garil and David R. Malpass, respectively) receives annually an additional \$25,000. The foregoing fees are allocated among all such funds as follows: (i) one-half of the expense is allocated pro rata based on the funds' relative net assets at the end of the calendar quarter preceding the date of payment; and (ii) one-half of the expense is allocated according to the number of such funds. No officer, director or employee of UBS AM or any of its affiliates presently receives any compensation from the funds for acting as a board member or officer. All board members are reimbursed for expenses incurred in attending meetings.

The table below includes certain information relating to the compensation of the Trust's current board members and the compensation of those board members from all funds for which UBS AM or an affiliate served as an investment advisor or manager during the periods indicated.

Compensation table¹

Name of person, position	UBS Select 100% US Treasury Institutional Fund ³	UBS Select 100% US Treasury Preferred Fund ³	Total compensation from the Trust and the fund complex ⁴
Heather R. Higgins, Trustee ²	N/A	N/A	\$327,700
Richard R. Burt, Trustee	N/A	N/A	265,000
Bernard H. Garil, Trustee	N/A	N/A	265,000
Virginia G. Breen, Trustee ²	N/A	N/A	141,015
David R. Malpass, Trustee	N/A	N/A	56,304

¹ Only Independent Trustees were compensated by the funds for which UBS AM serves as investment advisor or manager.

² Mrs. Higgins and Ms. Breen also serve on the boards of other registered investment companies for which an affiliate of UBS AM serves as investment advisor or manager.

³ The funds have not commenced operations as of April 30, 2023. As a result, no compensation was paid for the fiscal year ended April 30, 2023.

⁴ Represents fees paid during the calendar year ended December 31, 2023 to each board member by: (a) 4 investment companies in the case of Messrs. Burt, Garil and Malpass; and (b) 7 investment companies in the case of Mrs. Higgins and Ms. Breen, for which UBS AM or one of its affiliates served as investment advisor or manager. No fund within the UBS fund complex has a bonus, pension, profit sharing or retirement plan.

Principal holders and management ownership of securities

As of March 11, 2024, trustees and officers owned in the aggregate less than 1% of the outstanding shares of each fund.

As of March 11, 2024, the Trust does not know of any person who owns beneficially 5% or more of the funds' shares.

Investment advisory, administration and principal underwriting arrangements

Investment advisory and administration arrangements—master level. UBS AM acts as investment advisor and administrator for the master fund in which the funds invest their assets. Pursuant to an investment management contract with respect to the master fund (the “Management Contract”), each fund is allocated an annual fee from the master fund, computed daily and paid monthly, at an annual rate of 0.100% of the fund’s average daily net assets up to and including \$30 billion; 0.0975% of the fund’s average daily net assets above \$30 billion up to and including \$40 billion; 0.0950% of the fund’s average daily net assets above \$40 billion up to and including \$50 billion; 0.0925% of the fund’s average daily net assets above \$50 billion up to and including \$60 billion; and 0.0900% of the fund’s average daily net assets above \$60 billion.

Under the terms of the Management Contract, the master fund bears all expenses incurred in its operation that are not specifically assumed by UBS AM. Expenses borne by the master fund include the following: (1) the cost (including brokerage commissions, if any) of securities purchased or sold by the fund and any losses incurred in connection therewith; (2) fees payable to and expenses incurred on behalf of the fund by UBS AM; (3) organizational expenses; (4) filing fees and expenses relating to the registration and qualification of the fund’s shares under federal and state securities laws and maintenance of such registrations and qualifications; (5) fees and salaries payable to trustees who are not interested persons (as defined in the Investment Company Act) of the Trust by reason of affiliation with UBS AM or any of UBS AM’s affiliates; (6) all expenses incurred in connection with the board members’ services, including travel expenses; (7) taxes (including any income or franchise taxes) and governmental fees; (8) costs of any liability, uncollectible items of deposit and other insurance or fidelity bonds; (9) any costs, expenses or losses arising out of a liability of or claim for damages or other relief asserted against the fund for violation of any law; (10) legal, accounting and auditing expenses, including legal fees of special counsel for the trustees who are not interested persons (as defined in the Investment Company Act) of the Trust by reason of affiliation with UBS AM or any of UBS AM’s affiliates; (11) charges of custodians, transfer agents and other agents; (12) costs of preparing share certificates; (13) expenses of setting in type and printing prospectuses and supplements thereto, statements of additional information and supplements thereto, reports and proxy materials for existing shareholders and costs of mailing such materials to existing shareholders; (14) any extraordinary expenses (including fees and disbursements of counsel) incurred by the fund; (15) fees, voluntary assessments and other expenses incurred in connection with membership in investment company organizations; (16) costs of mailing and tabulating proxies and costs of meetings of shareholders, the board and any committees thereof; (17) the cost of investment company literature and other publications provided to trustees and officers; (18) costs of mailing, stationery and communications equipment; (19) expenses incident to any dividend, withdrawal or redemption options; (20) charges and expenses of any outside pricing service used to value portfolio securities; and (21) interest on borrowings of the fund.

The Management Contract is terminable (1) by the master fund by vote of the Master Trust’s board or by the holders of a majority of the outstanding voting securities of the master fund at any time without penalty, on 60 days’ written notice to UBS AM, and (2) by UBS AM at any time, without the payment of any penalty, on 60 days’ written notice to the Trust.

The master fund and UBS AM have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the master fund’s ordinary total operating expenses through March 11, 2025 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, expenses related to shareholders’ meetings and extraordinary expenses) would not exceed 0.10% for the master fund. The master fund has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing

the master fund's expenses in any of those three years to exceed the lesser of any applicable expense limit that is in place for the master fund (i) at the time of the waiver or reimbursement, or (ii) at the time of recoupment, and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the master fund's board at any time and also will terminate automatically upon the expiration or termination of the master fund's advisory contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

In addition, UBS AM may voluntarily undertake to waive fees in the event that fund yields drop below a certain level. These additional undertakings are voluntary and not contractual and may be terminated at any time and are not subject to future recoupment.

The funds have not commenced operations as of April 30, 2023. As a result, no fees were allocated to the funds for the fiscal years ended April 30, 2023, 2022 or 2021.

Administration arrangements—feeder level

UBS AM acts as administrator of the funds pursuant to an administration contract with respect to each fund (the "Administration Contract"). Under the Administration Contract, each fund pays UBS AM an annual fee, computed daily and paid monthly, at an annual rate of 0.08% of its average daily net assets.

Under the terms of the Administration Contract, each fund bears all expenses incurred in its operation that are not specifically assumed by UBS AM. Expenses borne by the funds include the following: (1) fees payable to and expenses incurred on behalf of the fund by UBS AM; (2) organizational expenses; (3) filing fees and expenses relating to the registration and qualification of the fund's shares under federal and state securities laws and maintenance of such registrations and qualifications; (4) fees and salaries payable to trustees who are not interested persons (as defined in the Investment Company Act) of the Trust by reason of affiliation with UBS AM or any of UBS AM's affiliates; (5) all expenses incurred in connection with the board members' services, including travel expenses; (6) taxes (including any income or franchise taxes) and governmental fees; (7) costs of any liability, uncollectible items of deposit and other insurance or fidelity bonds; (8) any costs, expenses or losses arising out of a liability of or claim for damages or other relief asserted against the fund for violation of any law; (9) legal, accounting and auditing expenses, including legal fees of special counsel for the trustees who are not interested persons (as defined in the Investment Company Act) of the Trust by reason of affiliation with UBS AM or any of UBS AM's affiliates; (10) charges of custodians, transfer agents and other agents; (11) costs of preparing share certificates; (12) expenses of setting in type and printing prospectuses and supplements thereto, statements of additional information and supplements thereto, reports and proxy materials for existing shareholders and costs of mailing such materials to existing shareholders; (13) any extraordinary expenses (including fees and disbursements of counsel) incurred by the fund; (14) fees, voluntary assessments and other expenses incurred in connection with membership in investment company organizations; (15) costs of mailing and tabulating proxies and costs of meetings of shareholders, the board and any committees thereof; (16) the cost of investment company literature and other publications provided to trustees and officers; (17) costs of mailing, stationery and communications equipment; (18) expenses incident to any dividend, withdrawal or redemption options; and (19) interest on borrowings of the fund.

The funds and UBS AM have entered into a written fee waiver/expense reimbursement agreement pursuant to which UBS AM is contractually obligated to waive its management fees and/or reimburse expenses so that the fund's ordinary total operating expenses through March 11, 2025 (excluding dividend expense, borrowing costs, and interest expense relating to short sales, and expenses attributable to investment in other investment companies, interest, taxes, brokerage commissions, expenses related to shareholders' meetings and extraordinary expenses) would not exceed 0.18% for UBS Select 100% US Treasury Institutional Fund and 0.14% for UBS Select 100% US Treasury Preferred Fund. Each fund has agreed to repay UBS AM for any waived fees/reimbursed expenses to the extent that it can do so over the following three fiscal years without causing the class expenses in any of those three years to exceed the lesser of any applicable expense limit that is in place for the fund (i) at the time of the waiver or

reimbursement, or (ii) at the time of recoupment, and that UBS AM has not waived the right to do so. The fee waiver/expense reimbursement agreement may be terminated by the fund's board at any time and also will terminate automatically upon the expiration or termination of the fund's administration contract with UBS AM. Upon termination of the agreement, however, UBS AM's three year recoupment rights will survive.

In addition, UBS AM may voluntarily undertake to waive administration fees in the event that fund yields drop below a certain level. These additional undertakings are voluntary and not contractual and may be terminated at any time and are not subject to future recoupment.

UBS AM has entered into a Sub-Administration Agreement with State Street to provide accounting, portfolio valuation and certain sub-administrative services for the funds. UBS AM pays State Street for the services it provides under the Sub-Administration Agreement.

The funds have not commenced operations as of April 30, 2023. As a result, no fees were allocated to the funds for the fiscal years ended April 30, 2023, 2022 or 2021.

Each fund has entered into a Service Agreement with State Street to provide certain regulatory support services to the fund, including: website posting of required information for money market funds and Form N-MFP and Form N-CR filing services. UBS AM pays State Street for the services it provides under the Service Agreement.

Proxy voting policies. The Trust board believes that the voting of proxies on securities held by a fund is an important element of the overall investment process. As such, the board has delegated the responsibility to vote such proxies to UBS AM. Following is a summary of UBS AM's proxy voting policy.

You may obtain information about a fund's proxy voting decisions, without charge, online on the funds' website (<http://www.ubs.com/ubsglobalam-proxy> under the appropriate "drop down" menu category on this Web page) or on the EDGAR database on the SEC's website (<http://www.sec.gov>) for the most recent 12-month period ending June 30th for which an SEC filing has been made.

UBS AM's proxy voting policy is based on its belief that voting rights have economic value and should be treated accordingly. Good corporate governance should in the long term, lead towards better corporate performance and improved shareholder value. Generally, UBS AM expects the boards of directors of companies issuing securities held by its clients to act in the service of the shareholders, view themselves as stewards of the company, exercise good judgment and practice diligent oversight of the management of the company. A commitment to acting in as transparent a manner as possible is fundamental to good governance. While there is no absolute set of standards that determine appropriate corporate governance under all circumstances, and no set of values that will guarantee ethical board behavior, there are certain principles, which UBS AM considers are appropriate to protect the economic value of its clients' investments. UBS AM may delegate to an independent proxy voting and research service the authority to exercise the voting rights associated with certain client holdings. Any such delegation shall be made with the direction that the votes be exercised in accordance with UBS AM's proxy voting policy.

When UBS AM's view of a company's management is favorable, UBS AM generally supports current management initiatives. When UBS AM's view is that changes to the management structure would probably increase shareholder value, UBS AM may not support existing management proposals. If management's performance has been questionable, UBS AM may abstain or vote against specific proxy proposals. In general, UBS AM generally exercises voting rights in accordance with the following principles: (1) with respect to board structure, (a) an effective chair is key, (b) the roles of chair and chief executive officer should be separated, (c) board members should have appropriate and diverse experience and be capable of providing good judgment and diligent oversight of management, (d) the board should include executive and non-executive members; and (2) with respect to board responsibilities, (a) the whole board should be fully involved in endorsing strategy and in all major strategic decisions, (b) the non-executive directors should provide

a challenging but positive environment for the executive directors and (c) the board should ensure that at all times (i) appropriate management succession plans are in place; (ii) the interests of executives and shareholders are aligned and the financial audit is independent and accurate; (iii) the brand and reputation of the company is protected and enhanced; (iv) a constructive dialogue with shareholders is encouraged; and (v) it receives all the information necessary to hold management accountable. UBS AM exercises its voting rights in accordance with overarching rationales outlined by its proxy voting policies and procedures that are based on the principles described above.

The proxy voting policy includes guidelines regarding consideration of environmental, social and corporate governance (“ESG”) factors during the exercise of voting rights on behalf of UBS AM’s clients, such as the fund. Underlying UBS AM’s voting and ESG guidelines are two fundamental objectives: (1) acting in the best financial interest of clients and enhancing the long term value of their investments; and (2) promoting best practice in corporate governance and ensuring that portfolio companies are sustainable and successful.

UBS AM has implemented procedures designed to address a conflict of interest in voting a particular proxy proposal, which may arise as a result of its or its affiliates’ client relationships, marketing efforts or banking, investment banking and broker/dealer activities. To address such conflicts, UBS AM has imposed information barriers between it and its affiliates who conduct banking, investment banking and broker/dealer activities and has implemented procedures to prevent business, sales and marketing issues from influencing its proxy votes. Whenever UBS AM becomes aware of a conflict with respect to a particular proxy, a vote normally will be cast in line with UBS AM’s proxy voting policy. If it is identified that this action would not be in the best interests of UBS AM’s clients, and under certain circumstances, the relevant internal UBS AM committee may be required to review and resolve the manner in which such proxy is voted.

Principal underwriting arrangements. UBS AM (US), 787 Seventh Avenue, New York, NY 10019 and One North Wacker Drive, Chicago, IL 60606, acts as the principal underwriter for each feeder fund pursuant to principal underwriting contracts with the Trust covering those funds (each a “Principal Underwriting Contract”). Each Principal Underwriting Contract requires UBS AM (US) to use its best efforts, consistent with its other business, to sell shares of the applicable funds. UBS AM (US) enters into selling agreements and dealer agreements with other broker-dealers (affiliated and unaffiliated) and with other institutions to authorize them to sell fund shares.

All Funds. UBS AM (US) may make cash and non-cash payments to affiliated and unaffiliated broker-dealers and other financial intermediaries (collectively, “Financial Intermediaries”) that engage in selling efforts on behalf of a fund, subject to the internal policies and procedures of UBS AM (US). The source of such payments may come from UBS AM (US)’s own resources (including through transfers from affiliates). Payments made out of its own resources are often referred to as “revenue sharing.” Revenue sharing payments generally are based on the value of fund shares sold as a result of such selling efforts although they could take other forms (such as, without limitation, ticket charges or “trail” fees for servicing shareholder accounts). Revenue sharing payments are negotiated by UBS AM (US) and may also be based on such other factors as the Financial Intermediary’s ability to attract and retain assets, the quality and quantity of the services provided by the Financial Intermediary, the Financial Intermediary’s relationship with UBS AM (US) or the reputation of the Financial Intermediary.

Revenue sharing payments are made by UBS AM (US) out of its own resources (and not out of fund assets). The value of a shareholder’s investment in one of these funds and the return on that investment will be unaffected by these revenue sharing payments. The source of revenue sharing payments may come from transfers from other UBS entities, such as UBS AM. UBS AM (US) may pay Financial Intermediaries a finder’s fee for a variety of reasons, including (1) where UBS AM (US) is paying shareholder servicing fees or making other payments to a separate Financial Intermediary that makes shares available to others, (2) where the assets in an account reach a certain threshold or (3) where a Financial Intermediary provides marketing support or access to sales platforms or personnel. UBS AM (US) provides Financial Intermediaries with sales literature and advertising materials relating to the registered investment companies advised by UBS AM. UBS AM (US) also shares expenses with Financial Intermediaries for costs incurred in hosting seminars for employees and clients of Financial Intermediaries, subject to UBS AM (US)’s internal policies and procedures governing payments for such seminars. These seminars may take place at UBS AM (US)’s headquarters or other appropriate locations and may include reimbursement of travel

expenses (*i.e.*, transportation, lodging and meals) of employees of Financial Intermediaries in connection with training and education seminars. Subject to UBS AM (US)'s internal policies and procedures, UBS AM (US) may provide any or all of the following to employees of Financial Intermediaries and their guest(s): (i) an occasional meal, a sporting event or theater ticket or other comparable entertainment; (ii) gifts of less than \$100 per person per year; and/or (iii) UBS AM (US)'s promotional items of nominal value (golf balls, shirts, etc.). In addition, Financial Intermediaries may maintain omnibus accounts and/or have similar arrangements with UBS AM (US) and may be paid by UBS AM (US) for providing sub-transfer agency and other services.

To the extent permitted by applicable law, revenue sharing payments may take other forms or may be paid for other reasons. Investors should note that such payments may be more or less than the compensation on similar or other investments that your Financial Intermediary receives and may thus influence your Financial Intermediary to present or recommend a fund. You should ask your Financial Intermediary about any payment it receives from UBS AM (US) and any services provided.

Securities lending. Pursuant to an agreement between the funds and State Street, the funds may lend their securities through State Street as securities lending agent to certain qualified borrowers (the "Securities Lending Agreement"). As securities lending agent of the funds, State Street administers the funds' securities lending program. These services include arranging the securities loans with approved borrowers and collecting fees and rebates due to the funds. State Street also collects and maintains collateral intended to secure the obligations of each borrower and marks to market daily the value of loaned securities. If a borrower defaults on a loan, State Street is authorized to exercise contractual remedies on behalf of the funds and, pursuant to the terms of the Securities Lending Agreement, has agreed to indemnify the funds for certain losses, which exclude losses associated with collateral reinvestment. State Street may also, in its capacity as securities lending agent, invest cash received as collateral in pre-approved investments in accordance with the Securities Lending Agreement. State Street, in its capacity as securities lending agent of the funds, is authorized to engage a third party bank as a special "tri-party" custodian for securities lending arrangements and enter into a separate custodial undertaking with each applicable borrower under the funds' securities lending program. State Street maintains records of loans made and income derived therefrom and makes available such records that the funds deem necessary to monitor the securities lending program.

The funds had not commenced operations as of April 30, 2023. As a result, the funds did not earn income or incur costs and expenses as a result of their securities lending activities.

Portfolio transactions

The funds purchase portfolio securities from dealers and underwriters as well as from issuers. Securities are usually traded on a net basis with dealers acting as principal for their own accounts without a stated commission. Prices paid to dealers in principal transactions generally include a “spread,” which is the difference between the prices at which the dealer is willing to purchase and sell a specific security at the time. When securities are purchased directly from an issuer, no commissions or discounts are paid. When securities are purchased in underwritten offerings, they include a fixed amount of compensation to the underwriter.

For purchases or sales with broker-dealer firms that act as principal, UBS AM seeks best execution. Although UBS AM may receive certain research or execution services in connection with these transactions, it will not purchase securities at a higher price or sell securities at a lower price than would otherwise be paid if no weight was attributed to the services provided by the executing dealer. UBS AM may engage in agency transactions in over-the-counter securities in return for research and execution services. These transactions are entered into only pursuant to procedures that are designed to ensure that the transaction (including commissions) is at least as favorable as it would have been if effected directly with a market-maker that did not provide research or execution services.

Research services and information received from brokers or dealers are supplemental to UBS AM’s own research efforts and, when utilized, are subject to internal analysis before being incorporated into their investment processes. Information and research services furnished by brokers or dealers through which or with which the funds effect securities transactions may be used by UBS AM in advising other funds or accounts and, conversely, research services furnished to UBS AM by brokers or dealers in connection with other funds or accounts may be used in advising the funds.

The funds had not commenced operations as of April 30, 2023. As a result, the funds did not pay brokerage commissions. The funds did not allocate any brokerage transactions for research, analysis, advice and similar services.

Investment decisions for the funds and for other investment accounts managed by UBS AM are made independently of one another in light of differing considerations for the various accounts. However, the same investment decision may occasionally be made for the funds and one or more of such accounts. In such cases, simultaneous transactions are inevitable. Purchases or sales are then averaged as to price and allocated between the funds and such other account(s) as to amount in a manner deemed equitable to the funds and such account(s). While in some cases this practice could have a detrimental effect upon the price or value of the security as far as the funds are concerned, or upon its ability to complete its entire order, in other cases it is believed that coordination and the ability to participate in volume transactions will be beneficial to the funds.

As of April 30, 2023, the master fund did not own securities issued by its regular broker-dealers or entities that may be deemed affiliates of those regular broker-dealers (as defined in Rule 10b-1 under the Investment Company Act).

Additional information regarding redemptions

Additional redemption information. The redemption price may be more or less than the shareholder's cost, depending on the market value of each fund's portfolio at the time, although the funds attempt to maintain a constant net asset value of \$1.00 per share.

If conditions exist that make cash payments undesirable, each fund reserves the right to honor any request for redemption by making payment in whole or in part in securities chosen by the fund and valued in the same way as they would be valued for purposes of computing the fund's net asset value. If payment is made in securities, the shareholder may incur expenses in converting these securities into cash.

Valuation of shares

Each feeder fund uses its best efforts to maintain its net asset value at \$1.00 per share using amortized cost-based pricing. The funds' net asset values per share are typically determined by the funds' custodian, State Street.

The master fund values its portfolio securities in accordance with the amortized cost method of valuation under Rule 2a-7 (the "Rule") under the Investment Company Act. To use amortized cost to value its portfolio securities, a master fund must adhere to certain conditions under the Rule relating to its investments, some of which are discussed in this SAI. Amortized cost is an approximation of market value of an instrument, whereby the difference between its acquisition cost and value at maturity is amortized on a straight-line basis over the remaining life of the instrument. The effect of changes in the market value of a security as a result of fluctuating interest rates is not taken into account, and thus the amortized cost method of valuation may result in the value of a security being higher or lower than its actual market value. If a large number of redemptions take place at a time when interest rates have increased, the master fund might have to sell portfolio securities prior to maturity and at a price that might not be desirable.

With respect to the master fund, the master fund's board has established procedures ("Procedures") for the purpose of stabilizing the value of such a master fund's net assets within 1/2 of 1% of the value determined based on amortized cost. The Procedures include a review of the extent of any deviation of net asset value, based on available market quotations. If that deviation exceeds 1/2 of 1% for a master fund, the board will promptly consider whether any action should be initiated to eliminate or reduce material dilution or other unfair results to shareholders. Such action may include redeeming interests in kind, selling portfolio securities prior to maturity, reducing or withholding dividends and utilizing a net asset value as determined by using available market quotations. In addition, if the board determines that a fund can no longer maintain a constant net asset value of \$1.00 per share, the fund may, as part of converting to a market based net asset value, take steps to: (i) temporarily suspend the offering of fund shares; (ii) delay the payment of redemption proceeds for up to seven days, as permitted by the Investment Company Act; and (iii) price its shares once a day at the last current valuation time (e.g., 12:00 p.m., Eastern time).

The board may also reduce the number of shares outstanding on a pro rata basis through a reverse stock split to the extent permissible by applicable law and the Trust's organizational documents. The board may consider this action if a fund has a negative gross yield as a result of negative interest rates to maintain a fund's \$1.00 net asset value per share. The use of such measures is subject to certain determinations by the fund's board and disclosure requirements, and may have tax implications for the fund and its shareholders. Consistent with SEC staff guidance, a reverse stock split may trigger a filing with the SEC on Form N-CR.

Rule 2a-5 ("Rule 2a-5") under the Investment Company Act provides that a market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable. Securities for which market quotations are not readily available must be valued at fair value as determined in good faith by the board. The board designated UBS AM as the valuation designee pursuant to Rule 2a-5 to perform fair value determinations for the funds. UBS AM, as the valuation designee, is responsible for periodically assessing any material risks associated with the determination of the fair value of a fund's investments; establishing and applying fair value methodologies; testing the appropriateness of fair value methodologies; and overseeing and evaluating third-party pricing services. UBS AM has a valuation committee to assist with its designated responsibilities as valuation designee. Valuing securities at fair value involves greater reliance on judgment than valuing securities that have readily available market quotations. Accordingly, there can be no assurance that the determination of a security's fair value in accordance with a fund's valuation procedures will in fact approximate the price at which a fund could sell that security at that time.

The master fund will maintain a dollar-weighted average portfolio maturity of 60 days or less and a dollar-weighted average life for its portfolio of 120 days or less, will not purchase any instrument having, or deemed to have, a remaining maturity of more than 397 days, will limit portfolio investments, including repurchase agreements, to those US-dollar denominated instruments that are of high quality under the Rule and that UBS AM, acting pursuant to the Procedures, determines present minimal credit risks, and will comply with certain reporting and recordkeeping procedures. If amortized cost ceases to represent fair value for the master fund using that method, UBS AM will take appropriate action as the funds' valuation designee pursuant to Rule 2a-5 under the Investment Company Act.

In determining the approximate market value of portfolio investments, the master fund may employ outside organizations, which may use a matrix or formula method that takes into consideration market indices, matrices, yield curves and other specific adjustments. This may result in the securities being valued at a price different from the price that would have been determined had the matrix or formula method not been used. Other assets, if any, are valued at fair value as determined in good faith by or under the direction of UBS AM as the funds' valuation designee.

Taxes

Qualification as a regulated investment company. Each feeder fund intends to qualify for treatment as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code. To so qualify, each feeder fund must distribute to its shareholders in each taxable year an amount at least equal to the sum of 90% of its investment company taxable income (consisting generally of net investment income and net short-term capital gain, if any, determined without regard to any deduction for dividends paid) and any net tax-exempt income and must meet several additional requirements. Among these requirements are the following: (1) the feeder fund must derive at least 90% of its gross income each taxable year from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of securities, net income derived from an interest in a qualified publicly-traded partnership and certain other income; (2) at the close of each quarter of the feeder fund’s taxable year, at least 50% of the value of its total assets must be represented by cash and cash items, US government securities, securities of other RICs and other securities that are limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of the feeder fund’s total assets nor 10% of the voting securities of such issuer; and (3) at the close of each quarter of the feeder fund’s taxable year, not more than 25% of the value of its total assets may be invested in securities (other than US government securities or the securities of other RICs) of any one issuer, in two or more issuers that the fund controls and which are engaged in the same or similar trades or businesses or of one or more qualified publicly traded partnerships.

By qualifying for treatment as a RIC, the feeder fund (but not its shareholders) will be relieved of federal income tax on the portion of its investment company taxable income and net capital gain that it distributes to shareholders, provided that it distributes an amount at least equal to 90% of its investment company taxable income and net tax-exempt income for the taxable year. If the feeder fund failed to qualify for treatment as a RIC for any taxable year, (1) it would be taxed as an ordinary corporation on the full amount of its taxable income for that year without being able to deduct the distributions it makes to its shareholders and (2) the shareholders would treat all those distributions as dividends (that would generally be taxed as ordinary income) to the extent of the fund’s earnings and profits. In addition, the feeder fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying for RIC treatment.

Taxes on fund distributions and redemptions. Distributions of investment company taxable income are taxable to you, whether paid in cash or reinvested in fund shares. Distributions of net investment income received by each fund from investments in debt securities and any net realized short-term capital gains distributed by each fund will be taxable to shareholders as ordinary income and will not be eligible for the dividends-received deduction for corporations. Due to their investment strategies, each feeder fund will not typically derive material amounts of net long-term capital gains.

Although current tax law generally provides for a minimum tax rate for individual taxpayers of 15% or 20% (depending on whether the individual’s income exceeds certain threshold amounts) on certain qualifying dividend income, distributions from funds such as these feeder funds investing primarily in bonds and other debt instruments via the master fund will not generally qualify for the lower tax rates.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from a fund and net gains from redemptions or other taxable dispositions of fund shares) of US individuals, estates and trusts to the extent that such person’s “modified adjusted gross income” (in the case of an individual) or “adjusted gross income” (in the case of an estate or trust) exceeds certain threshold amounts.

Certain distributions reported by a fund as Section 163(j) interest dividends under the Internal Revenue Code may be treated as interest income by shareholders for purposes of the tax rules applicable to interest expense limitations

under Internal Revenue Code Section 163(j). Such treatment by the shareholder is generally subject to holding period requirements and other potential limitations, although the holding period requirements are generally not applicable to dividends declared by money market funds and certain other funds that declare dividends daily and pay such dividends on a monthly or more frequent basis. The amount that a fund is eligible to report as a Section 163(j) dividend for a tax year is generally limited to the excess of a fund's business interest income over the sum of a fund's (i) business interest expense and (ii) other deductions properly allocable to a fund's business interest income.

Taxable distributions to non-US shareholders will generally be subject to a 30% withholding tax (or lower applicable treaty rate). However, certain properly reported distributions paid by the funds that are attributable to "qualified interest income" (generally, interest that would not have been subject to US federal withholding tax at the source if received directly by a non-US shareholder) or short-term capital gain are generally exempt from the 30% withholding tax to the extent the funds properly report such distributions. "Qualified interest income" includes, in general, US source (1) bank deposit interest, (2) short-term original discount, (3) interest (including original issue discount, market discount, or acquisition discount) on an obligation which is in registered form, unless it is earned on an obligation issued by a corporation or partnership in which the funds are a 10-percent shareholder or is contingent interest, and (4) any interest-related dividend from another regulated investment company. Non-US source interest income is not eligible for exemption from US federal withholding tax, and distributions of non-US source income will be subject to the 30% US withholding tax unless reduced by an applicable tax treaty. The funds' transfer agent, or a financial intermediary through whom an investor owns fund shares, may withhold US federal income tax on an entire dividend if a fund reports that less than all of the dividend is an interest-related dividend. Similarly, it is possible that a financial intermediary may withhold US federal income tax on a dividend even if a fund reports that all of the dividend is an interest-related dividend. In such scenarios, tax withheld by the transfer agent or intermediary would generally be refundable, but would generally require the non-US shareholder to file a US income tax return to claim the refund.

Each fund is required to withhold US tax (at a 30% rate) on payments of taxable dividends made to certain shareholders that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the US Department of the Treasury of US-owned foreign investment accounts. Shareholders may be requested to provide additional information to the funds to enable the funds to determine whether withholding is required.

The tax consequences to a non-US shareholder entitled to claim the benefits of an applicable tax treaty might differ from those described herein. Non-US shareholders are advised to consult their own tax advisors with respect to the particular tax consequences to them of investing in the funds.

Nonresidents may also be subject to US estate tax with respect to their shares of a fund.

Each fund will be subject to a nondeductible 4% excise tax to the extent it fails to distribute by the end of any calendar year substantially all its ordinary (*i.e.*, taxable) income (taking into account certain deferrals and elections) for that year and any capital gain net income for the one-year period ending October 31 of that year, plus certain other amounts.

You will generally not recognize any gain or loss on the sale or exchange of your fund shares as long as the fund maintains a share price of \$1.00. However, a liquidity fee imposed by a fund will reduce the amount you will receive upon the redemption of your shares, and will decrease the amount of any capital gain or increase the amount of any capital loss you will recognize from such redemption. There is some degree of uncertainty with respect to the tax treatment of liquidity fees received by money market funds, and such tax treatment may be the subject of future guidance issued by the Internal Revenue Service ("IRS"). If a fund receives liquidity fees, it will consider the appropriate tax treatment of such fees to the fund at such time.

Please be advised that abandoned or unclaimed property laws for certain states (to which your account may be subject) require financial organizations to transfer (escheat) unclaimed property (including shares of a fund) to the appropriate

state if no activity occurs in an account for a period of time specified by state law. For IRA accounts escheated to a state under these abandoned property laws, the escheatment will generally be treated as a taxable distribution to you; federal and any applicable state income tax will be withheld. This may apply to your Roth IRA as well.

The foregoing is a general, abbreviated summary of certain provisions of the federal tax laws currently in effect as they directly govern the taxation of shareholders of each fund. These provisions are subject to change by legislative or administrative action, and any such change may be retroactive with respect to fund transactions. Shareholders are advised to consult with their own tax advisers for more detailed information concerning federal tax matters, as well as the effects of any state, local and foreign tax laws.

Tax treatment of the master fund. The master fund will be treated as a non-publicly traded partnership for federal income tax purposes rather than as a RIC or a corporation under the Internal Revenue Code. Under the rules applicable to a non-publicly traded partnership, a proportionate share of any interest, dividends, gains and losses of a corresponding master fund will be deemed to have been realized (*i.e.*, “passed through”) to its interest holders (including a fund) regardless of whether any amounts are actually distributed by the master fund. Each interest holder in a master fund will be taxed on such proportionate share, as determined in accordance with the governing instruments of the master fund, the Internal Revenue Code and applicable regulations, in determining such interest holder’s federal income tax liability. Therefore, to the extent that a master fund were to accrue but not distribute any income or gains, a fund investing in the master fund would be deemed to have realized its proportionate share of such income or gains without receipt of any corresponding distribution. However, the master fund will seek to minimize recognition by its interestholders (including the funds) of income and gains without a corresponding distribution. Furthermore, the master fund’s assets, income and distributions will be managed in such a way that an interestholder in a master fund will be able to continue to qualify as a RIC by investing its assets through the master fund.

Backup withholding. Each fund is required to withhold 24% of all dividends payable to individuals and certain other non-corporate shareholders who do not provide the fund or UBS Financial Services Inc. with a correct taxpayer identification number or who are otherwise subject to backup withholding.

Potential conflicts of interest

Activities of UBS Asset Management (Americas) LLC and its affiliates (collectively, “UBS Asset Management”), UBS Securities LLC and UBS Financial Services Inc. and their affiliates (collectively, “UBS”) and other accounts managed by UBS

UBS Asset Management is a large asset management firm with approximately \$1.2 trillion in assets under management worldwide as of December 31, 2023.¹ UBS Asset Management offers investment capabilities and investment styles across all major traditional and alternative asset classes, including equity, fixed income, currency, hedge fund, real estate, infrastructure and private equity investment capabilities that can also be combined in multi-asset strategies. UBS Asset Management has nine main hubs globally: Chicago, Hong Kong, London, New York, Shanghai, Singapore, Sydney, Tokyo and Zurich.

UBS is a worldwide full-service investment banking, broker-dealer, asset management and financial services organization. As a result, UBS Asset Management and UBS (including, for these purposes, their directors, partners, officers and employees) worldwide, including the entities and personnel who may be involved in the investment activities and business operations of the funds, are engaged in businesses and have interests other than that of managing the funds. These activities and interests include potential multiple advisory, transactional, financial, consultative, and other interests in transactions, companies, securities and other instruments that may be engaged in, purchased or sold by the funds. This section sets forth considerations of which investors in the funds should be aware, and which may cause conflicts of interest on the part of UBS and UBS Asset Management that could disadvantage the funds. To address these potential conflicts, UBS and UBS Asset Management have established various policies and procedures that are reasonably designed to detect and prevent these potential conflicts of interest and prevent the funds from being disadvantaged.

Prospective investors should carefully review the following, which more fully describes these and other potential conflicts of interest presented by UBS Asset Management’s and UBS’ other businesses and interests.

Potential conflicts relating to portfolio decisions, the sale of fund shares and the allocation of investment opportunities

UBS’ other activities may have an impact on the funds. UBS Asset Management makes decisions for the funds in accordance with its obligations as investment advisor to the funds. However, UBS’ other activities may, at the same time, have a negative impact on the funds. As a result of the various activities and interests of UBS, it is likely that the funds will have multiple business relationships with, engage in transactions with, make voting decisions with respect to, or obtain services from UBS and other entities for which UBS performs or seeks to perform investment banking or other services. It is also likely that the funds will undertake transactions in securities in which UBS makes a market or otherwise has other direct or indirect interests.

UBS conducts extensive broker-dealer, banking and other activities around the world and provides investment banking, broker-dealer, prime brokerage, administrative and other services to clients which may involve markets and securities in which the funds invest. These activities will give UBS broad access to the current status of certain markets and investments. As a result of the activities described in this paragraph and the access and knowledge arising from those activities, parts of UBS may be in possession of information in respect of markets and investments, which, if known to UBS Asset Management, might cause UBS Asset Management to seek to dispose of, retain or increase interests in investments held by a fund or acquire certain positions on behalf of a fund. UBS will be under no duty to make any such information available to the funds or personnel of UBS Asset Management making investment decisions on behalf of the funds and maintains information barriers designed to prevent the misuse of such information. In general, personnel of UBS Asset Management making investment decisions will make decisions based solely upon information known by such decision makers without regard to information known by other UBS personnel.

¹ UBS AM managed approximately \$365.3 billion as of December 31, 2023.

In conformance with a fund's investment objective and subject to compliance with applicable law, UBS Asset Management may purchase securities for a fund during an underwriting or other offering of securities in which a broker/dealer affiliate acts as a manager, co-manager, underwriter or placement agent, or receives a benefit in the form of management, underwriting, or other fees. Affiliates of UBS Asset Management may act in other capacities in such offerings for which a fee, compensation, or other benefit will be received. From time to time, affiliates of UBS Asset Management will be current investors in companies engaged in an offering of securities which UBS Asset Management may purchase on behalf of its clients. Such purchases may provide a direct or indirect benefit to UBS Asset Management affiliates acting as a selling shareholder. UBS Asset Management may also participate in structured fixed income offerings of securities in which a related person may serve as trustee, depositor, originator, service agent or other service provider in which fees will be paid to such related person. Further, a related person may act as originator and/or servicing agent of loans or receivables for a structured fixed income offering in which UBS Asset Management may invest fund assets. Participation in such offering may directly or indirectly relieve financial obligations of related persons.

UBS Asset Management may purchase or sell, or recommend for purchase or sale, for its investment advisory clients securities of companies: (i) with respect to which its affiliates act as an investment banker or financial adviser; (ii) with which its affiliates have other confidential relationships; (iii) in which its affiliates maintain a position or (iv) for which its affiliates make a market; or in which it or its officers, directors or employees or those of its affiliates own securities or otherwise have an interest. Except to the extent prohibited by law or regulation or by client instruction, UBS Asset Management may recommend to its clients, or purchase for its clients, securities of issuers in which UBS has an interest as described in this paragraph.

UBS' financial and other interests and relationships may incentivize UBS to promote the sale of fund shares. UBS, its personnel and other financial service providers, have interests in promoting sales of the funds. UBS Asset Management may also make cash and non-cash payments to banks, broker-dealers, insurance companies, financial planning firms and other financial intermediaries, that sell shares of the funds, subject to UBS Asset Management's internal policies and procedures. The source of such payments may come from sales charges on such shares, 12b-1 fees collected from the fund and/or from the underwriter's own resources (including through transfers from affiliates). Payments made out of the underwriter's own resources are often referred to as "revenue sharing." Please read the section entitled "Investment advisory, administration and principal underwriting arrangements" for more information.

With respect to both UBS and its personnel, the remuneration and profitability relating to services to and sales of the funds or other products may be greater than the remuneration and profitability relating to services to and sales of other products that might be provided or offered by UBS or other third parties. UBS and its sales personnel may directly or indirectly receive a portion of the fees and commissions charged to the funds or their shareholders. UBS and its advisory or other personnel may also benefit from increased amounts of assets under management. Fees and commissions charged to the funds may also be higher than for other products or services, and the remuneration and profitability to UBS and such personnel resulting from transactions on behalf of or management of the funds may be greater than the remuneration and profitability resulting from similar transactions for other funds or products.

UBS also may have relationships with, and purchase, or distribute or sell, services or products from or to, distributors, consultants and others who recommend the funds, or who engage in transactions with or for the funds. For example, UBS regularly participates in industry and consultant sponsored conferences and may purchase educational, data or other services from consultants or other third parties that it deems to be of value to its personnel and its business. The products and services purchased from consultants may include, but are not limited to, those that help UBS understand the consultant's points of view on the investment management process. Consultants and other parties that provide consulting or other services to potential investors in the funds may receive fees from UBS or the funds in connection with the distribution of shares in the funds or other UBS products. For example, UBS may enter into revenue or fee sharing arrangements with consultants, service providers, and other intermediaries relating to investments in mutual funds,

collective trusts, or other products or services offered or managed by UBS Asset Management. UBS may also pay a fee for membership in industry-wide or state and municipal organizations or otherwise help sponsor conferences and educational forums for investment industry participants including, but not limited to, trustees, fiduciaries, consultants, administrators, state and municipal personnel and other clients. UBS' membership in such organizations allows UBS to participate in these conferences and educational forums and helps UBS interact with conference participants and to develop an understanding of the points of view and challenges of the conference participants. In addition, UBS' personnel, including employees of UBS, may have board, advisory, brokerage or other relationships with issuers, distributors, consultants and others that may have investments in the funds or that may recommend investments in the funds. In addition, UBS, including UBS Asset Management, may make charitable contributions to institutions, including those that have relationships with clients or personnel of clients. UBS' personnel may also make political contributions. As a result of the relationships and arrangements described in this paragraph, consultants, distributors and other parties may have conflicts associated with their promotion of the funds or other dealings with the funds that create incentives for them to promote the funds or certain portfolio transactions.

To the extent permitted by applicable law, UBS Asset Management may make payments to authorized dealers and other financial intermediaries ("Intermediaries") from time to time to promote the funds. The additional payments by UBS Asset Management may also compensate Intermediaries for subaccounting, administrative and/or shareholder processing services that are in addition to the fees paid for these or similar services by the funds. Payments made by UBS Asset Management may vary between different Intermediaries. Please read the section entitled "Investment advisory, administration and principal underwriting arrangements" for more information.

Potential conflicts relating to the allocation of investment opportunities among the funds and other UBS accounts. UBS Asset Management provides investment advisory services to certain accounts, including through model based programs, UBS Asset Management may have investment discretion ("Discretionary Accounts") or may not have investment discretion ("Non-Discretionary Accounts"). In the case of Non-Discretionary Accounts, the account will typically be notified of recommended changes to a model simultaneously with the Discretionary Accounts. With respect to the funds, UBS Asset Management may follow a strategy that is expected to be similar over time to that utilized by those accounts. The funds and the Non-Discretionary Account clients are subject to independent management and, given the independence in the implementation of advice to these accounts, there can be no assurance that such investment advice will be implemented simultaneously. Neither UBS Asset Management nor its affiliates will know when advice issued has been executed (if at all) and, if so, to what extent. Therefore, it is possible that prior execution by Non-Discretionary Accounts could adversely affect the prices and availability of the securities, currencies and instruments in which a fund invests.

Other potential conflicts relating to the management of the funds by UBS Asset Management

Potential restrictions and issues relating to information held by UBS. From time to time and subject to UBS Asset Management's policies and procedures regarding information barriers, UBS Asset Management may consult with personnel in other areas of UBS, or with persons unaffiliated with UBS. The performance by such persons of obligations related to their consultation with personnel of UBS Asset Management could conflict with their areas of primary responsibility within UBS or elsewhere. There will be no obligation on the part of such persons to make available for use by the funds any information or strategies known to them or developed in connection with their own client, proprietary or other activities. In addition, UBS will be under no obligation to make available any research or analysis prior to its public dissemination.

In connection with its management of the funds, UBS Asset Management may have access to certain fundamental analysis and proprietary technical models developed by UBS Asset Management or its affiliates (including UBS). UBS Asset Management will not be under any obligation, however, to effect transactions on behalf of the funds in accordance with such analysis and models. In addition, neither UBS Asset Management nor any of its affiliates (including UBS) will have any obligation to make available any information regarding their proprietary activities or strategies, or the activities or strategies used for other accounts managed by them, for the benefit of the

management of the funds, and it is not anticipated that UBS Asset Management will have access to such information for the purpose of managing the funds. The proprietary activities or portfolio strategies of UBS Asset Management and its affiliates (including UBS) or the activities or strategies used for accounts managed by them or other client accounts could conflict with the transactions and strategies employed by UBS Asset Management, and have adverse effects on the funds.

Potential conflicts relating to UBS' and UBS Asset Management's proprietary activities and activities on behalf of other accounts. Transactions undertaken by UBS or client accounts managed by UBS ("Client Accounts") may adversely impact the funds. UBS and one or more Client Accounts may buy or sell positions while a fund is undertaking the same or a differing, including potentially opposite, strategy, which could disadvantage the fund. For example, an equity fund (but not these money market funds) may establish a short position in a security and UBS or other Client Accounts may buy that same security. The subsequent purchase may result in an increase of the price of the underlying position in the short sale exposure of the equity fund and such increase in price would be to the equity fund's detriment. Conversely, the equity fund may buy a security, and UBS or Client Accounts may establish a short position in that same security. The subsequent short sale may result in impairment of the price of the security which the equity fund holds. Conflicts may also arise because portfolio decisions regarding the equity fund may benefit UBS or other Client Accounts. For example, the sale of a long position or establishment of a short position by the equity fund may impair the price of the same security sold short by (and therefore benefit) UBS or other Client Accounts, and the purchase of a security or covering of a short position in a security by the equity fund may increase the price of the same security held by (and therefore benefit) UBS or other Client Accounts.

The directors, officers and employees of UBS and UBS Asset Management may buy and sell securities or other investments for their own accounts or for seed capital accounts (including through investment funds managed by UBS and UBS Asset Management). As a result of differing trading and investment strategies or constraints, positions may be taken by directors, officers and employees that are the same, different from or made at different times than positions taken for a fund. To reduce the possibility that a fund will be materially adversely affected by the personal or proprietary trading described above, the funds, UBS and UBS Asset Management have established policies and procedures that restrict securities trading in the personal accounts of investment professionals and others who normally come into possession of information regarding the funds' portfolio transactions.

UBS Asset Management's affiliates have direct or indirect interests in electronic communication networks and alternative trading systems (collectively "ECNs"). UBS Asset Management, in accordance with its fiduciary obligation to seek to obtain best execution, may execute client trades through ECNs in which its related persons have, or may acquire, an interest. A related person may receive compensation based upon its ownership percentage in relation to the transaction fees charged by the ECNs. UBS Asset Management will execute through an ECN in which a related person has an interest only in situations where it reasonably believes such transactions will be in the best interests of its clients and the requirements of applicable law have been satisfied.

In accordance with Section 11(a) of the Securities Exchange Act of 1934, as amended, and the rules thereunder, UBS Asset Management's affiliates may effect transactions for funds or advisory client accounts on a national securities exchange of which an affiliate is an equity owner and/or a member and may retain compensation in connection with those transactions.

Gifts and entertainment. From time to time, directors, officers and employees of UBS and UBS Asset Management may receive gifts and/or entertainment from clients, intermediaries, or service providers to the funds, UBS and UBS Asset Management, which could have the appearance of affecting or may potentially affect the judgment of the directors, officers and employees or the manner in which they conduct business on behalf of the funds, UBS and UBS Asset Management. To reduce the appearance of impropriety and the possibility that the funds may be materially adversely affected by such gifts and entertainment, UBS and UBS Asset Management have established policies and procedures that restrict the receipt of gifts and entertainment from clients, intermediaries, or service providers to the funds, UBS and UBS Asset Management.

UBS may in-source or outsource. Subject to applicable law, UBS, including UBS Asset Management, may from time to time and without notice to investors in-source or outsource certain processes or functions in connection with a variety of services that it provides to the funds in its administrative or other capacities. Such in-sourcing or outsourcing may give rise to additional conflicts of interest.

Selection of brokers and dealers and commission rates

While UBS Asset Management selects brokers primarily on the basis of the execution capabilities, UBS Asset Management, in its discretion, may cause a client to pay a commission to brokers or dealers for effecting a transaction for that client in excess of the amount another broker or dealer would have charged for effecting that transaction. This may be done when UBS Asset Management has determined in good faith that the commission is reasonable in relation to the value of the execution, brokerage and/or research services provided by the broker. UBS Asset Management's arrangements for the receipt of research services from brokers may create conflicts of interest, in that UBS Asset Management has an incentive to choose a broker or dealer that provides research services, instead of one that charges a lower commission rate but does not provide any research.

UBS Asset Management does not allocate the relative costs or benefits of research received from brokers or dealers among clients because UBS Asset Management believes that the research received is, in the aggregate, of assistance in fulfilling UBS Asset Management's overall responsibilities to clients. The research may be used in connection with the management of accounts other than those for which trades are executed by the brokers or dealers providing the research. UBS Asset Management may receive a variety of research services and information on many topics, which UBS Asset Management can use in connection with its management responsibilities with respect to the various accounts over which it exercises investment discretion or otherwise provides investment advice. These topics include: issuers, industries, securities, economic factors and trends, portfolio strategy, the performance of accounts, statistical information, market data, earnings estimates, credit analysis, pricing, risk measurement analysis, and other information that may affect US or foreign economies, security prices, or management of the portfolio.

The research services may include written reports, pricing and appraisal services, market data services, analysis of issues raised in proxy statements, educational seminars, subscriptions to trade journals, portfolio attribution and monitoring services and computer software and access charges which are directly related to investment research. Research services may be received in the form of written reports, online services, telephone contacts and personal meetings with security analysts, economists, corporate and industry spokespersons, investment consultants and government representatives. Research services are either provided directly by broker-dealers or generated by third parties and are provided by the brokerage firm to which the commissions are paid including commission sharing arrangements.

Certain services may be mixed use, or used for research purposes as well as other purposes. Payment for these services is made as follows: the portion allocated to research is paid for through commissions, and the portion allocated to other purposes is paid for by UBS Asset Management. This allocation is determined by UBS Asset Management's Best Execution and Trading Committee in good faith and based on objective criteria, to the extent available, of the amounts used for research and non-research purposes; however, the decision regarding what amounts are paid by UBS Asset Management versus paid by clients through commissions presents a conflict of interest. Research services received from brokers and dealers may be supplemental to UBS Asset Management's own research efforts and, when utilized, are subject to internal analysis before being incorporated into UBS Asset Management's investment process. As a practical matter, it would not be possible for UBS Asset Management to generate all of the information presently provided by brokers and dealers.

UBS Asset Management may receive in-house or proprietary research from dealers that execute trades on a principal basis for its clients. The research received will be of the type described above, excluding third-party research services.

Potential regulatory restrictions on investment advisor activity

From time to time, the activities of the funds may be restricted because of regulatory requirements applicable to UBS and/or its internal policies designed to comply with, limit the applicability of, or otherwise relate to such requirements. A client not advised by UBS would not be subject to some of those considerations. There may be periods when UBS Asset Management may not initiate or recommend certain types of transactions, or may otherwise restrict or limit its advice with respect to certain securities or instruments issued by or related to companies for which UBS is performing investment banking, market making or other services or has proprietary positions or otherwise has come into possession of material inside information. For example, when UBS is engaged in an underwriting or other distribution of securities of, or advisory services for, a company, the funds may be prohibited from or limited in purchasing or selling securities of that company. Similar situations could arise if UBS personnel serve as directors of companies the securities of which a fund wishes to purchase or sell. The larger UBS Asset Management's investment advisory business and UBS' businesses, the larger the potential that these restricted list policies will impact investment transactions. However, if permitted by applicable law, a fund may purchase securities or instruments that are issued by such companies or are the subject of an underwriting, distribution, or advisory assignment by UBS, or in cases in which UBS personnel are directors or officers of the issuer.

The investment activities of UBS for its proprietary accounts and for Client Accounts may also limit the investment strategies and rights of the funds. For example, in regulated industries, in certain emerging or international markets, in corporate and regulatory ownership definitions, and in certain futures and derivative transactions, there may be limits on the aggregate amount of investment by affiliated investors that may not be exceeded without the grant of a license or other regulatory or corporate consent or, if exceeded, may cause UBS, the funds or other Client Accounts to suffer disadvantages or business restrictions. If certain aggregate ownership thresholds are reached or certain transactions undertaken, the ability of UBS Asset Management on behalf of a fund to purchase or dispose of investments, or exercise rights or undertake business transactions, may be restricted by regulation or otherwise impaired. As a result, UBS Asset Management on behalf of a fund may limit purchases, sell existing investments, or otherwise restrict or limit the exercise of rights (including voting rights) when UBS Asset Management, in its sole discretion, deems it appropriate.

UBS Asset Management and its affiliates, including, without limitation, UBS and its advisory affiliates, have proprietary interests in, and may manage or advise with respect to, accounts or funds (including separate accounts, other funds and collective investment vehicles) that have investment objectives similar to those of the funds and/or that engage in transactions in the same types of securities, currencies and instruments as the funds. UBS and its affiliates are also major participants in the global currency, equities, swap and fixed income markets, in each case both on a proprietary basis and for the accounts of customers. As such, UBS and its affiliates may be actively engaged in transactions in the same securities, currencies, and instruments in which the funds invest. Such activities could affect the prices and availability of the securities, currencies, and instruments in which the funds invest, which could have an adverse impact on a fund's performance. Such transactions, particularly in respect of most proprietary accounts or client accounts, will be executed independently of the funds' transactions and thus at prices or rates that may be more or less favorable than those obtained by the funds. UBS Asset Management has developed policies and procedures consistent with regulatory requirements that provide that it will allocate investment opportunities and make purchase and sale decisions among the funds and other client accounts in a manner that it considers, in its sole discretion and consistent with its fiduciary obligation to each account, to be reasonable. Allocations may be based on numerous factors and may not always be pro rata based. Thus, this system may adversely affect the size or price of the assets purchased or sold for the funds.

The results of the funds' investment activities may differ significantly from the results achieved by UBS Asset Management and its affiliates for their proprietary accounts or other accounts (including investment companies or collective investment vehicles) managed or advised by them. It is possible that UBS Asset Management and its affiliates and such other accounts will achieve investment results that are substantially more or less favorable than the results achieved by the funds. Moreover, it is possible that a fund will sustain losses during periods in which UBS Asset Management and its affiliates achieve significant profits on their trading for proprietary or other accounts. The opposite result is also possible.

The investment activities of UBS Asset Management and its affiliates for their proprietary accounts and accounts under their management may also limit the investment opportunities for a fund in certain emerging and other markets in which limitations are imposed upon the amount of investment, in the aggregate or in individual issuers, by affiliated foreign investors.

From time to time, the funds' activities may also be restricted because of regulatory restrictions applicable to UBS Asset Management and its affiliates, and/or their internal policies designed to comply with such restrictions. As a result, there may be periods, for example, when UBS Asset Management, and/or its affiliates, will not initiate or recommend certain types of transactions in certain securities or instruments with respect to which UBS Asset Management and/or its affiliates are performing services or when position limits have been reached where such securities or instruments otherwise would have been permissible investments for the funds. Additionally, the funds or certain accounts may be licensed to trade securities or engage in transactions in certain jurisdictions while other funds and accounts are not licensed.

In addition, certain officers and certain employees of UBS Asset Management are also officers or employees of UBS, or its affiliated entities. As a result, the performance by these officers and employees of their obligations to such other entities may be a consideration of which investors in the funds should be aware.

UBS Asset Management may enter into transactions and invest in securities, instruments and currencies on behalf of a fund where customers of UBS or, to the extent permitted by the SEC, UBS itself, serves as the counterparty, principal or issuer. In such cases, such party's interests in the transaction will be adverse to the interests of the fund, and such party may have no incentive to assure that the fund obtains the best possible prices or terms in connection with the transaction. In addition, the purchase, holding and sale of such investments by the fund may enhance the profitability of UBS Asset Management and/or UBS. UBS and its affiliates may also create, write or issue derivative instruments for customers of UBS or its affiliates, the underlying securities, currencies or instruments of which may be those in which a fund invests or which may be based on the performance of a fund. The funds may, subject to applicable law, purchase investments that are the subject of an underwriting or other distribution by UBS or its affiliates and may also enter into transactions with other clients of UBS Asset Management or its affiliates where such other clients have interests adverse to those of the funds. At times, these activities may cause UBS Asset Management or its affiliates to give advice to clients that may cause these clients to take actions adverse to the interests of the funds. To the extent affiliated transactions are permitted, the funds will deal with UBS Asset Management, UBS and its affiliates on an arms-length basis. UBS Asset Management or UBS may also have an ownership interest in certain trading or information systems used by the funds. The fund's use of such trading or information systems may enhance the profitability of UBS Asset Management and its affiliates.

It is also possible that, from time to time, UBS Asset Management or any of its affiliates may, although they are not required to, purchase and hold shares of the funds. Increasing a fund's assets may enhance investment flexibility and diversification and may contribute to economies of scale that tend to reduce the expense ratio of certain types of funds. UBS Asset Management and its affiliates reserve the right to redeem at any time some or all of the shares of the funds acquired for their own accounts. A large redemption of shares of a fund by UBS Asset Management or its affiliates could significantly reduce the asset size of the fund, which might have an adverse effect on the fund's investment flexibility, portfolio diversification, expense ratio and may result in significant transaction costs. UBS Asset Management will consider the effect of redemptions on the fund and other shareholders in deciding whether and when to redeem its shares.

It is possible that the funds may invest in securities of companies with which UBS has or is trying to develop investment banking relationships as well as securities of entities in which UBS Asset Management or UBS has significant debt or equity investments or in which UBS makes a market. The funds also may invest in securities of companies to which UBS Asset Management or UBS provides or may someday provide research coverage. Such investments could cause conflicts between the interests of the funds and the interests of other UBS Asset Management or UBS clients. In making investment decisions for the funds, UBS Asset Management is not permitted

to obtain or use material non-public information acquired by any division, department or affiliate of UBS Asset Management in the course of these activities. In addition, from time to time, UBS' activities may limit the funds' flexibility in purchases and sales of securities. When UBS is engaged in an underwriting or other distribution of securities of an entity, UBS Asset Management may be prohibited from purchasing or recommending the purchase of certain securities of that entity for the funds.

Present and future activities of UBS Asset Management and its affiliates, in addition to those described in this section, may give rise to additional conflicts of interest.

UBS AM may buy for a fund securities or obligations of issuers in which UBS or other funds or accounts have made, or are making, an investment in securities or obligations that are subordinate or senior to securities of the fund. For example, a fund may invest in debt securities of an issuer at the same time that UBS or other funds or accounts are investing, or currently have an investment, in equity securities of the same issuer. To the extent that the issuer experiences financial or operational challenges which may impact the price of its securities and its ability to meet its obligations, decisions by UBS (including UBS AM) relating to what actions to be taken may also raise conflicts of interests, and UBS may take actions for certain accounts that have negative impacts on other advisory accounts.

While UBS AM will make proxy voting decisions as it believes appropriate and in accordance with UBS AM's policies designed to help avoid conflicts of interest, proxy voting decisions made by UBS AM with respect to a fund's portfolio securities may have the effect of favoring the interests of other clients or businesses of other divisions or units of UBS. UBS AM's proxy voting policy is discussed in more detail in the section entitled "Proxy voting policies and procedures."

As a registered investment adviser under the Advisers Act, UBS AM is required to file a Form ADV with the SEC. Form ADV Part 2 contains information about assets under management, types of fee arrangements, types of investments, potential conflicts of interest, and other relevant information regarding UBS AM. A copy of UBS AM's Form ADV Parts 1 and 2 is available on the SEC's website (www.adviserinfo.sec.gov).

Other information

Delaware statutory trust. Although Delaware law statutorily limits the potential liabilities of a Delaware statutory trust's shareholders to the same extent as it limits the potential liabilities of a Delaware corporation's shareholders, shareholders of a fund could, under certain conflicts of laws jurisprudence in various states, be held personally liable for the obligations of the Trust or the funds. However, the Trust's Trust Instrument disclaims shareholder liability for acts or obligations of the Trust or its funds. The Trust Instrument provides for indemnification from each fund's property for all losses and expenses of any fund shareholder held personally liable for the obligations of a fund. Thus, the risk of a shareholder's incurring financial loss on account of shareholder liability is limited to circumstances in which a fund itself would be unable to meet its obligations, a possibility which UBS AM believes is remote and not material. Upon payment of any liability incurred by a shareholder solely by reason of being or having been a shareholder of a fund, the shareholder paying such liability will be entitled to reimbursement from the general assets of the fund. The trustees intend to conduct the operations of the funds in such a way as to avoid, as far as possible, ultimate liability of the shareholders for liabilities of the funds.

Classes of shares. UBS Select 100% US Treasury Preferred Fund consists of Class T and Class P shares. A share of each class of the fund represents an identical interest in the fund's investment portfolio and has the same rights, privileges and preferences. However, each class may differ with respect to expenses, including service fees, if any, other expenses allocable exclusively to each class, voting rights on matters exclusively affecting that class, and its exchange privilege, if any. If different expenses are applicable to the different classes of shares of the fund it would affect the performance of those classes. Each share of the fund is entitled to participate equally in dividends, other distributions and the proceeds of any liquidation of that fund. However, if there were differing expenses of the classes, dividends and liquidation proceeds on Class T and Class P shares would differ.

Voting rights. Shareholders of each fund are entitled to one vote for each full share held and fractional votes for fractional shares held. Voting rights are not cumulative and, as a result, the holders of more than 50% of all the shares of the Trust may elect all its board members. The shares of each series of the Trust will be voted separately, except when an aggregate vote of all the shares is required by law.

UBS Series Funds does not hold annual meetings. There normally will be no meetings of shareholders to elect trustees unless fewer than a majority of the trustees holding office have been elected by shareholders. Shareholders of record holding no less than two-thirds of the outstanding shares of UBS Series Funds may remove a board member by vote cast in person or by proxy at a meeting called for that purpose. A meeting will be called to vote on the removal of a board member at the written request of holders of record of at least 10% of the outstanding shares of UBS Series Funds.

Prior names. Prior to March 9, 2018, UBS Series Funds was known as UBS Money Series.

Custodian; transfer and dividend agent. State Street, located at One Congress Street, Suite 1, Boston, MA 02114, is custodian of the master fund's assets and provides other services to the funds. BNY Mellon Investment Servicing (US) Inc. ("BNY Mellon"), a subsidiary of BNY Mellon Bank, N.A., serves as each fund's transfer and dividend disbursing agent. BNY Mellon is located at 400 Bellevue Parkway, Wilmington, DE 19809.

Counsel. The law firm of Dechert LLP, Three Bryant Park, 1095 Avenue of the Americas, New York, NY 10036, serves as counsel to the funds. Dechert LLP also has acted as counsel to UBS AM in connection with other matters. Proskauer Rose LLP, Eleven Times Square New York, NY 10036, serves as independent counsel to the Independent Trustees.

Independent registered public accounting firm. Ernst & Young LLP, One Manhattan West, New York, NY 10001, serves as independent registered public accounting firm for the funds.
